## **Online Lower Ed Profit Colleges Inequality:**

**Educating Inequality** Robert Samuels, 2017-07-06 Politicians and school officials often argue that higher education is the solution to many of our social and economic problems. *Educating Inequality* argues that in order to reduce inequality and enhance social mobility, public policies are needed to revamp the financial aid system and increase the number of good jobs. Exploring topics such as the fairness of the current social system, the focus on individual competition in an unequal society, and democracy and capitalism in higher education, this important book seeks to uncover the major myths that shape how people view higher education and its relation to the economy. Looking to models that generate economic mobility and social equality, this book advocates a broader vision for public higher education to promote universal equality and global awareness.

**The New College Classroom** Cathy N. Davidson, Christina Katopodis, 2022-08-30 What the latest science of learning tells us about inspiring effective and inclusive teaching at the college level. College instruction is stuck in the past. If a time traveler from a century ago arrived on today's campuses, they would recognize only too well the listlessness of the lecture hall and the awkward silence of the seminar room. Yet we know how to do better. Cathy N. Davidson and Christina Katopodis, two of the world's foremost innovators in higher education, turn to the latest research and methods to show how teachers at every kind of institution can help students become independent, creative, and active learners. *The New College Classroom* helps instructors in all disciplines create an environment that is truly conducive to learning. Davidson and Katopodis translate cutting-edge research in learning science and pedagogy into ready-to-use strategies to incorporate into any course. These empirically driven, classroom-tested techniques of active learning, from the participatory syllabus and ungrading to grab-and-go activities for every day of the term, have achieved impressive results at community colleges and research universities on campus, online, and in hybrid settings. Extensive evidence shows that active learning tools are more effective than conventional methods of instruction. Davidson and Katopodis explain how and why their approach works and provide detailed case studies of educators successfully applying active learning techniques in their courses every day, ensuring that their students are better prepared for the world after college.

**Back in School** A. Fiona Pearson, 2019-07-12 Fifty years ago, students who were parents were a rarity in college classrooms, but recently over a quarter of all undergraduate students were parents. A. Fiona Pearson explores how these student parents navigate cultural norms and institutional resources, forging pathways as they journey to become better parents and successful students.

**The New Education** Cathy N. Davidson, 2017-09-05 A leading educational thinker argues that the American university is stuck in the past and shows how we can revolutionize it for our era of constant change. Our current system of higher education dates to the period from 1865 to 1925. It was in those decades that the nation's new universities created grades and departments, majors and minors, all in an attempt to prepare young people for a world transformed by the telegraph and the Model T. As Cathy N. Davidson argues in *The New Education*, this approach to education is wholly unsuited to the era of the gig economy. From the Ivy League to

community colleges she introduces us to innovators who are remaking college for our own time by emphasizing student centered learning that values creativity in the face of change above all The New Education ultimately shows how we can teach students not only to survive but to thrive amid the challenges to come

**The Power of Sociology** Gudmundur Oddsson,Jenny M. Stuber,James Michael Thomas,2025-12-10 Explore the world of sociology through a defining feature of all societies power The Power of Sociology Grasping Our Unequal World introduces students to sociology through the discipline s primary concern the causes and consequences of social inequality and at its core power The central organizing principle of social life power is relevant to every reader and fundamental to all major sub areas of sociology Authors Gudmundur Oddsson Jenny M Stuber and James Michael Thomas weave discussions of power throughout the book and devote a chapter to a broad exploration of the concept To highlight the social impacts of rapid globalization and growing global inequality this book embraces a cross cultural comparative perspective thereby elevating under represented voices from the sociological community around the globe This approach challenges students to see themselves as global citizens capable of making their communities and our world a better place This text is offered in Sage Vantage an intuitive learning platform that integrates quality Sage textbook content with assignable multimedia activities and auto graded assessments to drive student engagement and ensure accountability Unparalleled in its ease of use and built for dynamic teaching and learning Vantage offers customizable LMS integration and best in class support Instructors see how Vantage works Take a brief self guided tour with our interactive demo
