Swarms, Viral Writing, and the Local

Carl Whithaus, 2025-04-15 Swarms Viral Writing and the Local examines the social and rhetorical dynamics around emerging writing technologies Carl Whithaus argues that these dynamics work across networked publics as patterns of behavior and ways of interacting through and with multimodal texts This rhetorical analysis of the production and reception of born digital rhetoric shows the ongoing and evolving impacts of online public discourse that can lead to bad restaurant reviews or the subversion of democracy It is a networked process that gains significance because of the interplay and tensions between the

global and the local As these texts are created distributed received and then recreated and shared again in viral ways different messages resonate across media ecologies Whithaus documents how emerging social dynamics shape and are shaped by digital writing reading and distribution technologies **Infrastructures of Reality: Metaverse Stories, Spaces, Bodies** Chris Hesselbein, Paolo Bory, 2025-08-09 This open access book focuses on two dimensions of the development of the metaverse that are crucial to reality namely spatiality and embodiment Metaversal technologies are thought to fundamentally affect both our spaces and bodies which are two central aspects of the constitution of social reality Both spatiality and embodiment are core elements of world making that are being pulled into the ambit of metaversal projects On the one hand metaversal technologies are profoundly spatial in the sense that they render space in virtual form or overlay digital layers onto pre existing physical spaces On the other hand metaversal technologies are directly geared towards the body in that they not only seek to extend or expand our embodied senses and emplace our bodies in virtual spaces but they also seek to capture their behaviours and actions on a far more granular level This can create new opportunities in terms of work social interaction and leisure but can also open our bodies up to new tech driven interventions and control Whether in the form of VR or AR such technologies not only reproduce space but also rely on making spaces more legible and open to automated interventions Taken together the metaversification of spaces and bodies gives rise to crucial questions about the goals and implications of metaversal developments by large technology companies and about the relationship between the developments of the metaverse and AI systems Drawing on our combined background and expertise in Science and Technology Studies and the History of Media and Communication we critically analyse the development of metaversal technologies and platforms by discussing a broad set of developments and examples from a wide range of technology and gaming companies Written in clear concise and accessible language and combining and applying novel theoretical frameworks and concepts to a currently emergent phenomenon this book will find a large audience not only within academic and professional circles but also in popular culture **Roblox - Complete Guide** Luciana

Eastern European Histories and Heritages in Video Games Michał Mochocki, Paweł Schreiber, Jakub Majewski, Yaroslau I. Kot, 2024-10-17

This book explores the representations of Central and Eastern European histories in digital games. Focusing on games that examine a range of national histories and heritages from across Central and Eastern Europe the volume looks beyond the diversity of the local histories depicted in games and the audience reception of these histories to show a diversity of approaches which can be used in examining historical games from postcolonialism to identity politics to heritage studies. The book includes chapters on Serbia, Poland, Ukraine, Russia, Belarus, Hungary, Estonia, Slovakia, Czechia, Finland, and a Western guest with regional connections Luxembourg. Through the lens of video games the authors address how nations struggle with the legacies of war, colonialism, and religious strife that have been a part of nation building but also how victimized cultures can survive, resist, and sometimes prevail. Appealing primarily to scholars in the fields of game studies, heritage studies, postcolonial criticism, and media studies, this book will be particularly useful for the subfields of historical game studies and postcolonial game studies.

[Children and Sexual-Based Online Harms](#) Catherine Knibbs, 2023-07-27

This sensitive guide for carers and professionals working with children and young people explains the serious issues of sexual content and harm that children face online. Covering technologies used by children aged two through to adulthood it offers clear evidence based information about sexual based online harm, its effects and what adults can do to support children should they see, hear or bear witness to these events online. Catherine Knibbs specialist advisor in the field explains the issues involved when using online platforms and devices in family, social and educational settings. The guide offers an accessible explanation of how online harm impacts developmental, neurological and social development as well as young people's mental health and well being. Examined in as non traumatising a way as possible the book covers key topics including consent, pornography, online grooming, sexting, live streaming, revenge porn, ASD, sexuality and gender, and vigilantism. Offering guidance and proactive and reactive strategies based on neuroscience and child development it shows how e safety is not one size fits all and must consider the vulnerabilities of individual children and families. Children and Sexual Based Online Harms will equip professionals and carers with the knowledge to support their work and to direct conversations about the online harms that children and young people face. It is essential reading for those training and working with children in psychological, educational and social work contexts as well as parents, policy makers and those involved in the development of online technologies.
