Science Communication Practice in China Fujun Ren, Lin Yin, Gauhar Raza, 2021-11-26 China has made remarkable and rapid progress in the area of science communication both in theory and practice This book critically examines all aspects of science communication practices in China Dealing with major turning points since the introduction of the Science and Technology Popularization Law and the Outline of the National Scheme for Scientific Literacy the book tells a success story by scrutinizing structural changes in science communication policies education system construction and efficacious utilisation of science popularisation facilities and creative use of a mix of traditional and modern channels of communication The book also gives an in depth analysis of the monitoring and evaluation mechanism which constitutes the backbone of the national science communication project The historical roots of science communication in China include shifts in methodologies policy instruments effectual approaches and resultant practices since the days of initial efforts to popularise modern scientific ideas However the primary focus of the book remains on the initiatives launched at the turn of the present century Without losing sight of the national dimensions each chapter of the book draws from provincial as well as grassroots level experiences Quantitative and qualitative methods have been used to analyse strengths weaknesses hurdles and the efficacy of corrective measures This book offers a remarkable insight to anyone who is interested in probing the causal relationship between science communication and China s transformation into a modern society The primary objective of the book is to analyse the nature of science communication with Chinese characteristics and the specificity of the socio cultural environment in which Science and Technology is located Though the book is of particular interest to scholars researchers students and practitioners of science communication the narrative style makes it accessible to the general reader who is interested in science society relationship

Computer Science Project Work Sally Fincher, Marian Petre, Martyn Clark, 2001-02-01 Ninety percent of any Computing Science academic staff are involved with project work at some stage of their working life Often they have no previous experience of how to handle it and there are no written guidelines or reference books at the moment Knowledge and practical experiences are often only disseminated from one institution to another when staff change jobs This book is the first reference work to fill that gap in the market It will be of use to lecturers and course designers who want to improve their handling of project work in specific courses and to department heads and deans who want to learn about overall strategic issues and experiences from other institutions

Ethics and Experiments Scott Desposato, 2015-12-22 For most of political science s history discussions about professional ethics had nothing to do with human subjects Professional ethics involved integrity in the classroom fair tenure and promotion rule and the careful avoidance of plagiarism As most research was observational there was little need for attention to how scholarly activities might directly affect the subjects of our work Times have changed The dramatic growth in the use of experiments in social science especially overseas is generating unexpected ethical controversies The purpose of this volume is to identify debate

and propose practical solutions to the most critical of these new ethical issues A leading team of internationally distinguished political science scholars presents the first examination of the practical and ethical challenges of research with human subjects in social science and policy studies Part 1 examines contextual challenges provided by experiments conducted overseas questions of culture religion security and poverty Part 2 examines questions of legal constraints on research focusing on questions of foreign review of international experiments Part 3 tackles the critical issues in field experiments including deception and consent impact on elections and careers the boundaries of the public officials exemption and the use of partner organizations to avoid Institutional Review Body IRB review Part 4 considers strategies for the future including training and education IRB reform institutional changes and norm development **The Popular Science Monthly** ,1893
