Generic and Indexed Programming Jeremy Gibbons,2012-07-20 Generic programming is about making programs more widely applicable via exotic kinds of parametrization not just along the dimensions of values or of types but also of things such as the shape of data algebraic structures strategies computational paradigms and so on Indexed programming is a lightweight form of dependently typed programming constraining flexibility by allowing one to state and check relationships between parameters that the shapes of two arguments agree that an encoded value matches some type that values transmitted along a channel conform to the stated protocol and so on The two forces of genericity and indexing balance each other nicely simultaneously promoting and controlling generality The 5 lectures included in this book stem from the Spring School on Generic and Indexed Programming held in Oxford UK in March 2010 as a closing activity of the generic and indexed programming project at Oxford which took place in the years 2006 2010

Effective Software Test Automation Kanglin Li,Mengqi Wu,2006-02-20 If you d like a glimpse at how the next generation is going to program this book is a good place to start Gregory V Wilson Dr Dobbs Journal October 2004 Build Your Own Automated Software Testing Tool Whatever its claims commercially available testing software is not automatic Configuring it to test your product is almost as time consuming and error prone as purely manual testing There is an alternative that makes both engineering and economic sense building your own truly automatic tool Inside you ll learn a repeatable step by step approach suitable for virtually any development environment Code intensive examples support the book s instruction which includes these key topics Conducting active software testing without capture replay Generating a script to test all members of one class without reverse engineering Using XML to store previously designed testing cases Automatically generating testing data Combining Reflection and CodeDom to write test scripts focused on high risk areas Generating test scripts from external data sources Using real and complete objects for integration testing Modifying your tool to test third party software components Testing your testing tool Effective Software Test Automation goes well beyond the building of your own testing tool it also provides expert guidance on deploying it in ways that let you reap the greatest benefits earlier detection of coding errors a smoother swifter development process and final software that is as bug free as possible Written for programmers testers designers and managers it will improve the way your team works and the quality of its products

A Survey on Today's Smartphone Usage
Tobias Himmelsbach, 2012-05-26 Diploma Thesis from the year 2011 in the subject Computer Science Miscellaneous grade 2
3 Technical University of Berlin Agententechnologien in betrieblichen Anwendungen language English abstract The
smartphone market is evolving rapidly irrespective of the well known spread within the business sector In recent years the
average users tend to replace their traditional mobile phones PDAs and Palms with smartphones These devices have become
a pervasive part of everyday life Dealing with huge amounts of data the mobile device s and application s demand for certain
security standards cannot be underestimated In recent studies the individual user s needs in terms of technical features
applications etc have not been addressed and analyzed properly To capture the problem in its full extent it is vital to
understand the user s expectations Besides the usage patterns have to be described especially against the background of
security aspects As mentioned before recent analyzes did not specifically ask what the user expects from a smartphone
Hence the main objective of this work is to get a broad picture on how smartphones are used today and what users expect
taking into consideration security aspects An international web based online survey was designed and performed to measure
and analyze users behaviour when using smartphones with the aim of finding out what they want and expect from a
smartphone The main goals were to identify user needs in the context of smartphones to analyze their knowledge and
acquisition to security aspects and to get significant data about the user s behaviour The main findings of the survey are that
on the one hand most of the users want a smartphone to provide classic mobile phone features such as performing phone
calls writing messages or storing contacts On the other hand they want a smartphone to provide mobile internet access
navigation features multimedia aspects a comfortable usability and a good lo
