*Charting Limitations on Trademark Rights* Haochen Sun, Barton Beebe, 2023-04-15 Trademark scholarship has focused largely on the protection of trademark rights against consumer confusion and the dilution of trademarks. Studies of limitations on trademark rights meanwhile have remained relatively peripheral, especially in jurisdictions outside of the United States. However, this reality is incongruous with the importance of the limitations, such as descriptive and nominative uses, in promoting freedom of commerce, market competition, free speech, and cultural dynamics. Against this backdrop, *Charting Limitations on Trademark Rights* is the first comprehensive academic volume detailing limitations in trademark rights from both theoretical and comparative perspectives. The book presents new theoretical perspectives to justify trademark rights limitations, re-examines the nature of these limitations, delineates the scope of the limitations, and offers comparative studies of the limitations. With contributions from leading trademark scholars in the EU, US, and Asia, this is a must-read for scholars, students, practitioners, and policymakers with an interest in the theories, policies, and doctrines of trademark law.
