Virtual and Augmented Reality for Architecture and Design Elisângela Vilar,Ernesto Filgueiras,Francisco Rebelo,2022-06-08 Virtual Reality VR is the paradigm wherein people use a computer to interact with something which is not real but provides a real life experience It is one of the most advanced interfaces between users and computers where people can interact with a virtual model in real

time allowing them to visualize and manipulate representations of the real world. Together with Augmented Reality AR which adds layers of information to the real environment VR is a powerful tool for designers and architects in the development of new responsive products systems and built environments that meet user's needs. VR and AR are tools that enhance design and architecture students' comprehension about complex and abstract concepts. Informative and accessible this publication presents analyses and discusses the integration and use of Virtual and Augmented Reality within the process of planning development and research for Design and Architecture. The book also presents case studies with multidisciplinary collaborative work. This book is meant for practitioners and academics alike as it examines specific aspects related to the use of new technologies in the field of Architecture and Design highlighting its application in areas such as education, heritage research and methodologies bridging the gap between Architectural and Design abstraction and human requirements through technology.
