

# MICROECONOMICS UNIT 1

## Basic Economic Concepts

### BIG PICTURE IDEAS

- Economics focuses on **scarcity** and how it requires individuals, businesses, and governments to make choices.
- Society's **opportunity cost** forces choices what will be produced and how it will be produced, while there it will be allocated.
- The production **possibilities curve** can show the different combinations of two goods that can be produced using all of a country's **resources** to the fullest.
- Countries that have a **comparative advantage** can specialize in the production of specific goods and trade with other countries at a lower **opportunity cost** than if they produce everything on their own.
- Marginal analysis** analyzes the benefits weighing the additional benefits and additional costs of any decision.

### Topic 1.1 - Scarcity

- Scarcity is the idea that individuals and society have **limited wants** but **limited resources**.
- The four factors of production are **land**, **labour**, **capital**, and **entrepreneurship**.
- What is the difference between **physical capital** and **human capital**?  
Physical capital is human-made resources where human capital is knowledge gained through experience.

### Topic 1.2 - Resource Allocation

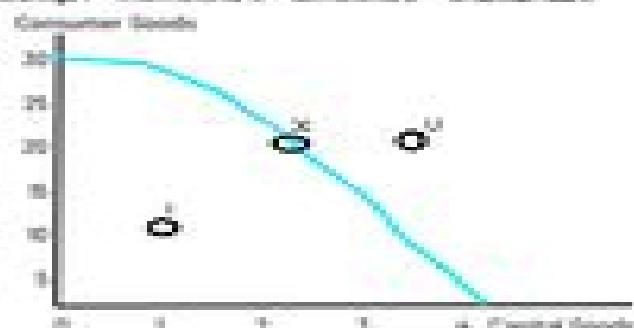

- Identify the characteristics of a **command economy**?  
More government involvement and more restrictions on free trade.
- Identify the characteristics of a **market economy**?  
Less government involvement and more free trade.
- Most countries have a **mixed economy** economy, which incorporates characteristics of both command and market economies.

### Topic 1.3 - Production Possibilities Curve

Use the chart to create a PFC so the graph labels a point showing each of the following: I = Inefficient, O = Efficient, U = Unattainable.

	A	B	C	D	E
Capital goods	0	1	2	3	4
Consumer goods	30	29	28	27	26

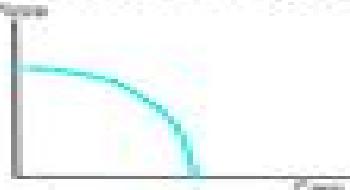

- What is the opportunity cost for moving between these combinations?  
From B to C: 1 Capital Good → From C to D: 1 Capital Good  
From D to E: 1 Capital Good → From C to E: 2 Capital Goods
- Assume operation O was preferred rather than operation U. Was this economy's growth rate increase, decrease, or stay the same?  
Explain: The economy will increase since there is more capital goods and that helps the growth in the economy.

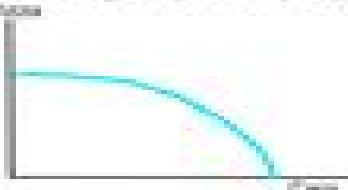

- The PFC can **shift**...  
explain when there are more resources or new **technology** that increases productivity.

On the graphs to the right, draw the PFC curve for each scenario using pizza and cans.

- Consumers want more pizza.

- More technology for producing cans.
