Sample Book Insights

- 1 We can't control where people sit in an auditorium but we can control how they choose their seats We can use this information to figure out what people were doing when they chose their seats
- 2 The seating arrangement in the auditorium was a simple example of how people can be influenced by each other's behavior If we know that people entering an auditorium have a sociable desire to sit near someone but always leave one empty seat between them we can predict the pattern that will appear when the entire audience has arrived
- 3 The system of interaction between individuals and their environment is what determines whether a simple summation or extrapolation can be made between individuals and their aggregates Sometimes the results are surprising and sometimes they are not easily guessed
- 4 There are several hypotheses as to why people sit where they do The most minimal is that nobody cares where they sit as long as they aren't in the very front People sit toward the rear as most of the audience arrives and then climb over seated people to occupy empty seats in the crowded section

Social Mechanisms Peter Hedström, Richard Swedberg, 1998-01-13 The advancement of social theory requires an analytical approach that systematically seeks to explicate the social mechanisms that generate and explain observed associations between events These essays written by prominent social scientists advance criticisms of current trends in social theory and suggest alternative approaches The mechanism approach calls attention to an intermediary level of analysis in between pure description and story telling on the one hand and grand theorizing and universal social laws on the other For social theory to be of use for the working social scientist it must attain a high level of precision and provide a toolbox from which middle range theories can be constructed

Economics and Sociology Richard Swedberg, 1990-02-14 The boundary between economics and sociology is presently being redefined but how why and by whom Richard Swedberg answers these questions in this thought provoking book of conversations with well known economists and sociologists Among the economists interviewed are Gary Becker Amartya Sen Kenneth Arrow and Albert O Hirschman the sociologists include Daniel Bell Harrison White James Coleman and Mark Granovetter The picture that emerges is that economists and sociologists have paid

little attention to each other during most of the twentieth century social problems have been analyzed as if they had no economic dimension and economic problems as if they had no social dimension Today however there is a dialogue between the two fields as economists take on social topics and as sociologists become interested in rational choice and new economic sociology The interviewees describe how they came to challenge the present separation between economics and sociology what they think of the various proposals to integrate the fields and how they envision the future The author summarizes the results of the conversations in the final chapter The individual interviews also serve as superb introductions to the work of these scholars
