This book is an exposition of how political cultural historical and economic structures and processes shape the nature and character of curriculum landscapes globally By developing theoretical connections and providing contextual background Kumar explores how colonialism and imperialism state led ideological control and the wave of neoliberalism and capitalism insidiously impact the process of curriculum development in different parts of the world Kumar also underscores how intellectual movements such as Marxism and postmodernism have shaped curriculum theory in varied political and economic settings By emphasizing the connections between and among diverse cultural and political conceptualizations of curriculum this volume contributes to the internationalization of curriculum studies discourses [Books Out-of-print](#) ,1981 [The United Nations and Civil Society](#) Nora McKeon,2013-07-04

The UN is able to recognize key global challenges but beset by difficulties in trying to resolve them In this it represents the current global political balance but is also the only international institution that could move it forward Civil society can be a catalyst for this kind of change In this book Nora McKeon provides a comprehensive analysis of UN engagement with civil society The book pays particular attention to food and agriculture which now lie at the heart of global governance issues McKeon shows that politically meaningful space for civil society can be introduced into UN policy dialogue The United Nations and Civil Society also makes the case that it is only by engaging with organizations which legitimately speak for the poor targeted by the Millennium Development Goals that the UN can promote equitable sustainable development and build global democracy from the ground up This book has strong ramifications for global governance civil society and the contemporary debate over the future of food [Nanomedicine, Volume I](#) Robert A. Freitas,2024-12-06

Molecular nanotechnology has been defined as the three dimensional positional control of molecular structure to create materials and devices to molecular precision The human body is comprised of molecules hence the availability of molecular nanotechnology will permit dramatic progress in human medical services More than just an extension of molecular medicine nanomedicine will employ molecular machine systems to address medical problems and will use molecular knowledge to maintain and improve human health at the molecular scale Nanomedicine will have extraordinary and far reaching implications for the medical profession for the definition of disease for the diagnosis and

treatment of medical conditions including aging for our very personal relationships with our own bodies and ultimately for the improvement and extension of natural human biological structure and function This book will be published in three volumes over the course of several years Readers wishing to keep up to date with the latest developments may visit the nanomedicine website maintained by the Foresight Institute <http://foresight.org> Nanomedicine index html
