Supercomputing in MIMD Architecture R. Michael Hord, 1993 Understanding Parallel Supercomputing R. Michael Hord, 1998-08-17 UNDERSTANDING PARALLEL SUPERCOMPUTING is an exhaustive applications oriented survey of the world s largest and fastest computers Beginning with the evolution of parallel supercomputing technology in recent history author R Michael Hord goes on to illustrate architectural concepts and implementations at the very center of today s cutting edge technology Topics featured include technology benefits and drawbacks software tools and programming languages major programming concepts sample parallel programs algorithmic methods both SIMD and MIMD architectures This carefully written text will be of interest to engineers scientists and program managers involved in geologic exploration aircraft design image processing weather modeling operations research chemical synthesis and medical applications It will also be of practical use to computer specialists Supercomputers in Theoretical and Experimental Science Jozef T. Devreese, Piet Van Camp, 2012-12-06 The International Workshop on The Use of Super computers in Theoretical Science took place from July 30 till August 1 1984 at the Conference Center of the Priorij Corsendonk close to the city of Antwerpen Belgium During the past decade computational science has developed itself to a third methodology besides the experimental and theoretical sciences This remarkable evolution was only possible due to a drastic increase of the computational power of present day computers Indeed computational physics and chemistry as such is certainly not new but it was only during the past ten years or so that realistic problems could be solved numerically to a sufficient degree of accuracy During this workshop the state of the art in high speed computation was presented by a team of lecturers who are well known for their competence in this field It is a pleasure to thank several organizations and companies who made this workshop possible First of all the main sponsors the Belgian National Science Found ation NFWO FNRS and the Universitaire Instelling Ant werpen

Next the co sponsors Agfa Gevaert N V Control Data Belgium and the Belgian Ministry of Education Special thanks are due to Dr P E Van Camp and Drs H Nachtegale for the practical organization of this workshop I would also like to thank Mrs H Evans for typing the manuscripts and for preparing the author and subject index v Last but not least I express my gratitude to Mr

Hockney,C.R Jesshope,1988-01-01 Since the publication of the first edition parallel computing technology has gained considerable momentum A large proportion of this has come from the improvement in VLSI techniques offering one to two orders of magnitude more devices than previously possible A second contributing factor in the fast development of the subject is commercialization The supercomputer is no longer restricted to a few well established research institutions and large companies A new computer breed combining the architectural advantages of the supercomputer with the advance of VLSI technology is now available at very attractive prices A pioneering device in this development is the transputer a VLSI processor specifically designed to operate in large concurrent systems *Parallel Computers 2 Architecture Programming and Algorithms* reflects the shift in emphasis of parallel computing and tracks the development of supercomputers in the years since the first edition was published It looks at large scale parallelism as found in transputer ensembles This extensively rewritten second edition includes major new sections on the transputer and the OCCAM language The book contains specific information on the various types of machines available details of computer architecture and technologies and descriptions of programming languages and algorithms Aimed at an advanced undergraduate and postgraduate level this handbook is also useful for research workers machine designers and programmers concerned with parallel computers In addition it will serve as a guide for potential parallel computer users especially in disciplines where large amounts of computer time are regularly used *Supercomputing '88: Supercomputer design: hardware & software* ,1988 Parallel Rendering Symposium ,1993
