Reading, Writing, and Literacy 2.0 Denise Johnson, 2014 In today's high stakes testing environment integrating technology into the curriculum is often seen as something extra or for use with a few special projects. With the growth in Internet use by even the youngest children, educators urgently need a practical introduction to online literacy and reading comprehension. *Reading Writing and Literacy 2.0* offers that and more by providing tools and teaching strategies for incorporating online reading and writing into classroom learning as well as a host of web resources that teachers can draw on to make this happen. All this without endless hours of searching. Denise Johnson's book connects to the Common Core State Standards and is organized around the Technological Literacy Assessment of the National Assessment of Education Progress (NAEP) which focuses on three areas that characterize a technologically literate person: knowledge, capabilities, and critical thinking and decision making. This resource provides everything reading teachers need to begin using technology to deepen and enrich literacy learning for all students. In addition, the author maintains a companion blog to update and add helpful teaching links. **Book Features:** An explanation of the concept and practices of literacy 2.0 and how it differs from literacy 1.0. Specific examples and resource links for using technology with diverse learners in the K-8 classroom, including translation sites and multilingual materials. Examples of teacher to student and student to student wiki and blog interactions. Companion blog offers ongoing support including links to resources, new teaching tools, classroom examples, and more. There are many things that I love about this book. It is written with a voice wise to both the opportunities and the challenges of classroom teaching. It also contains a vast number of ideas that can be immediately used in your classroom. Of course, too, it describes effective teaching of new literacies with so many new technologies. In addition, it begins by providing a clear and compelling framework to put all of the upcoming ideas into a package that will make perfect sense to any teacher. From the Foreword by Donald J. Leu, Neag Chair in Literacy and Technology, University of Connecticut Neag School of Education. Written in a clear and practical format, this book weaves research based practices across print and digital literacy worlds into engaging learning communities for younger and older readers alike. Denise Johnson's innovative lessons and assessment ideas provide step by step supports for designing curriculum in a Web 2.0 world. Julie Coiro, University of Rhode Island.

The Joy of Children's Literature Denise Johnson, 2023-12-18 This book provides in-depth coverage of children's literature with integrated reading methods in a concise, accessible format. Johnson emphasizes that reading, writing, discussing, and finding pleasure in children's books are essential tools in being able to recognize and recommend literature and being able to share the joy of children's literature with children themselves. This fully updated third edition includes up-to-date research, new book titles within each chapter, a greater focus on diversity and inclusion, and new sections on Activities for Professional Development and Print and Online Resources.
