**ECHO: A Vocal Language Program for Easing Anxiety in Conversation** Cesar E. Ruiz, Evelyn R. Klein, Louis R. Chesney, 2021-12-13 ECHO A Vocal Language Program for Easing Anxiety in Conversation is for clinicians supporting individuals who may experience social anxiety related to speaking in specific situations or with certain individuals Anxiety has a negative impact on working memory which can make it difficult for individuals to communicate with ease With reduced experiences talking to a variety of people in various situations speaking often becomes more challenging The ECHO program was developed to build ease and comfort with social pragmatic communication focusing on improving conversational skills for children from later elementary through teenage years The program can be implemented by speech language pathologists psychologists educators and other facilitators including parents who support the needs of children and teens with selective mutism stuttering and those in need of social communication support This unique intervention program combines methods of

vocalization and verbalization to enhance conversational skills with role play simulations for real life application There are three modules in the ECHO program that build upon each other Module 1 uses interactive games to focus on vocal control helping the child or teen learn how to initiate voice modulate intonation and volume with greater ease and produce classes of speech sounds in words and sentences Module 2 provides targeted skills for the child or teen to use language for different purposes change language for the listeners or situation and follow rules for conversation and storytelling all with online interactive games to become a more spontaneous communicator Module 3 builds on the previous two modules by providing conversational role plays which simulate real life situations in school at home and in social and public settings A cognitive behavioral therapy CBT framework is applied to help reduce cognitive distortions Key Features Three modules bridging the gap from vocalization to conversation The ECHO Checklist to identify communication needs Social Communication Skills Pragmatics Checklist The ARC model for understanding anxiety tolerance rescue reduction and communication confidence Thirty five interactive games and activities with over 150 photos online and printed to help children and teens gain skills necessary to vocalize and engage in conversation Disclaimer Please note that ancillary content such as documents audio and video etc may not be included as published in the original print version of this book

**The Selective Mutism Resource Manual** Maggie Johnson, Alison Wintgens, 2017-07-28 For anyone who needs to understand assess or manage selective mutism this is a comprehensive and practical manual that is grounded in behavioural psychology and anxiety management and draws on relevant research findings as well as the authors extensive clinical experience Now in its second edition and including new material for adolescents and adults The Selective Mutism Resource Manual 2e provides an up to date summary of literature and theory to deepen your understanding of selective mutism a wealth of ideas on assessment and management in home school and community settings so that its relevance extends far beyond clinical practice a huge range of printable online handouts and other resources case studies and personal stories to illustrate symptoms and demonstrate the importance of tailored interventions This book is essential reading for people who have selective mutism as well as for the clinicians therapists educators caseworkers and families who support them

**How to Be, and Remain, a Compassionate Educator** Anne Emerson, 2025-04-17 As educators the attitude with which we approach our work has considerable impact on the outcome for students Our assumptions and expectations influence learning both positively and negatively This book adopts a compassionate acceptance that all children no matter what they say don t say or do are doing the best they can in that moment It is in the adults power and their responsibility to understand children and barriers they experience in their learning By exploring neuroscience psychology and learning theory we can increase our awareness of brain organisation and function to help us understand why a child isn t doing what we have asked With understanding comes both our compassion and ability to support The case studies and examples from the author s practice illustrate how we can learn from effective strategies for neurodivergent children to build insight into all pupils When we adopt a non judgemental

and encouraging approach we form positive collaborative relationships with children and their families that increase engagement with and enjoyment of learning and reduces our own frustration and stress This book is valuable reading for all educators equipping them with an understanding that allows them to work flexibly and creatively to meet the learning and emotional needs of all pupils    Unspeakable Harriet Shawcross,2019-03-07

Compassionate Guardian Extremely affecting Scotsman As a teenager Harriet Shawcross stopped speaking at school for almost a year As an adult she became fascinated by the limits of language From the inexpressible trauma of trench warfare and the aftermath of natural disaster to the taboo of coming out Harriet examines all the ways in which words scare us She studies wartime poet George Oppen interviews the author of The Vagina Monologues meets Nepalese earthquake survivors and the founders of the Samaritans and asks what makes us silent    *Linguistics and Language Behavior Abstracts* ,2007-02    The Social Work Dictionary Robert L.

**Developing a Subtyping System for Selective Mutism** Sharon Liza Cohan,2007 The accumulated knowledge about selective mutism SM suggests that children who receive this diagnosis are a heterogeneous group some are characterized by high levels of social anxiety while others also exhibit behavioral and speech language problems This study was designed to develop an empirically derived subtyping system for SM using parent report measures of social anxiety Social Anxiety Scale for Children Revised La Greca Eyberg Bishop 2003 The sample consisted of 130 children recruited from a large SM advocacy group Results from latent profile analysis comparing 2 3 and 4 class models supported a 3 class solution but a 4 class solution was also plausible The 3 class model suggested the existence of an anxious mildly oppositional subtype an anxious communication delayed subtype and a primarily anxious subtype Follow up analyses for the 3 class model indicated no significant subtype differences in functional impairment Child Anxiety Impact Scale Parent Version Langley Bergman McCracken Bergman Keller Wood Piacentini Achenbach 2001 and expressive receptive language abilities Vineland Adaptive Behavior Scales II Sparrow Cicchetti Balla 2005 Our results indicate that SM children are characterized by high levels of social anxiety but they may also show speech language delays and low level behavior problems Viewing SM as solely due to anxiety may cause researchers and clinicians to overlook important facets of the disorder    *NORD Resource Guide* ,2005
