Who We are and how We Got Here David Reich (Of Harvard Medical School), 2018 David Reich describes how the revolution in the ability to sequence ancient DNA has changed our understanding of the deep human past This book tells the emerging story of our often surprising ancestry the extraordinary ancient migrations and mixtures of populations that have made us who we are **Reconfiguring the Silk Road** Victor H. Mair, Jane Hickman, 2014-09-08 From the Bronze Age through the Middle Ages a network of trade and migration routes brought people from across Eurasia into contact Their commerce included political social and artistic ideas as well as material goods such as metals and textiles Reconfiguring the Silk Road offers new research on the earliest trade and cultural interactions along these routes mapping the spread and influence of Silk Road economies and social structures over time This volume features contributions by renowned scholars uncovering new discoveries related to populations that lived in the Tarim Basin the advanced state of textile manufacturing in the region and the diffusion of domesticated grains across Inner Asia Other chapters include an analysis of the dispersal of languages across the Eurasian Steppe and a detailed examination of the domestication of the horse in the region Contextualized with a foreword by Colin Renfrew and introduction by Victor Mair Reconfiguring the Silk Road provides a new assessment of the intercultural evolution along the steppes and beyond Contributors David W Anthony Elizabeth Wayland Barber Dorcas R Brown Peter Brown Michael D Frachetti Jane Hickman Philip L Kohl Victor H Mair J P Mallory Joseph G Manning Colin Renfrew **Mobile Pastoralist Households** Jean-Luc Houle, 2024-10-01 Mobile pastoralist activities occur at different scales across the landscape including local regional and supra regional scales Most archaeological studies of mobile pastoralist social organization have focused on the latter two scales via the extant monumental and herding landscapes Household levels of analysis figure much less in these studies This volume brings together the work of archaeologists currently engaged in mobile pastoralist household research in different regions of the world to highlight the importance of household studies and the utility of both archaeological and ethnoarchaeological approaches in understanding mobile pastoralist household formation continuity and adaptation to environmental social economic and political change **Who We Are and How We Got Here** David Reich, 2018-03-23 The past few years have witnessed a revolution in our ability to obtain DNA from ancient humans This important new data has added to our knowledge from archaeology and anthropology helped resolve long existing controversies challenged long held views and thrown up remarkable surprises The emerging picture is one of many waves of ancient human migrations so that all populations living today are mixes of ancient ones and often carry a genetic component from archaic humans David Reich whose team has been at the forefront of these discoveries explains what genetics is telling us about ourselves and our complex and often surprising ancestry Gone are old ideas of any kind of racial purity Instead we are finding a rich variety of mixtures Reich describes the cutting edge findings from the past few years and also considers the sensitivities involved in tracing ancestry with science sometimes jostling with politics and

tradition He brings an important wider message that we should recognize that every one of us is the result of a long history of migration and intermixing of ancient peoples which we carry as ghosts in our DNA What will we discover next Effects of novel environments on domesticated species Xinyi Liu,Giedre Motuzaite Matuzeviciute,Shinya Shoda,Petra

Vaiglova,2023-03-31 **The Amesbury Archer and the Boscombe Bowmen** A. P. Fitzpatrick,2013-11-01 Found a few kilometres from Stonehenge the graves of the Amesbury Archer and the Boscombe Bowmen date to the 24th century BC and are two of the earliest Bell Beaker graves in Britain The Boscombe Bowmen is a collective burial and the Amesbury Archer is a single burial but isotope analyses suggest that both were the graves of incomers to Wessex The objects placed in both graves have strong continental connections and the metalworking tool found in the grave of the Amesbury Archer may explain why his mourners afforded him one of the most well furnished burials yet found in Europe This excavation report contains a series of wide ranging studies and scientific analyses by an array of experts and a discussion of the graves within their British and continental European contexts **A Bronze Age Landscape in the Russian Steppes** David W.

Anthony,Dorcas R. Brown,Aleksandr A. Khokhlov,Pavel F. Kuznetsov,Oleg D. Mochalov,2016-12-31 The first English language monograph that describes seasonal and permanent Late Bronze Age settlements in the Russian steppes this is the final report of the Samara Valley Project a US Russian archaeological investigation conducted between 1995 and 2002 It explores the changing organization and subsistence resources of pastoral steppe economies from the Eneolithic 4500 BC through the Late Bronze Age 1900 1200 BC across a steppe and river valley landscape in the middle Volga region with particular attention to the role of agriculture during the unusual episode of sedentary settled pastoralism that spread across the Eurasian steppes with the Srubnaya and Andronovo cultures 1900 1200 BC Three astonishing discoveries were made by the SVP archaeologists agriculture played no role in the LBA diet across the region a surprise given the settled residential pattern a unique winter ritual was practiced at Krasnosamarskoe involving dog and wolf sacrifices possibly related to male initiation ceremonies and overlapping spheres of obligation cooperation and affiliation operated at different scales to integrate groups defined by politics economics and ritual behaviors **The Concise Oxford Dictionary of Archaeology**

Timothy Darvill,2008 *Social Orders and Social Landscapes* Laura M. Popova,Charles W. Hartley,Adam T. Smith,2007 *Social Orders and Social Landscapes* marks a new direction in research for Eurasian archaeology that focuses on how people lived in their local environment and interacted with their near and distant neighbours rather than on overarching comparisons of archaeological culture complexes Stemming from the 2005 University of Chicago Eurasian Archaeology Conference the papers collected here reflect this new research agenda though the way in which each author addressed the theme of the conference and thus the book was strikingly varied This diversity arises out of the field TM s intellectual flux driven by the principled engagement of the rich analytical traditions of the Soviet CIS Anglo American and European schools Despite the variability in approaches and subject matter several key themes emerged 1 the reinterpretation culture

categories by examining particular aspects of social life 2 the role social memory plays in the production of landscape and place 3 the influence of the built environment on societies and 4 the ways in which economic considerations affect social orders and landscapes The result is a book that helps to re image Eurasia as a complex landscape fragmented by historically contingent and shifting ecological and social boundaries rather than a bounded mosaic of culture areas or environmental zones

Scholarly research on Eurasia was transformed by the collapse of the Soviet Union in 1991 Entire areas and fields of research became accessible to European and American scholars for the first time resulting in the emergence of new centers specializing in primary field investigations throughout the vast politically transformed landmass of Eurasia One such center is the University of Chicago that has recently sponsored two large international conferences on Eurasian archaeology *Social Orders and Social Landscapes* is the product of the second Chicago conference held in spring 2005 The editors of the volume should be proud of their efforts that have resulted in such a broad ranging and prompt publication The articles encompass a variety of disciplinary perspectives including archaeology history art history palynology and zooarchaeology extend chronologically from Neolithic and Bronze Age times to the formation of national identity in Turkey in the early 20th century and range geographically from Europe to China Several articles reconstruct basic subsistence activities others analyze distinctive settlement types and political and cultural frontiers including the assimilation and emergence of new self defined ethnic groups and the selective adoption of new systems of religious belief What unites this diverse collection is their consistent emphasis on the social construction of reality and the production of social landscapes and memories that altered perceptions of the physical world and mediated the practical activities that here have been convincingly reconstructed from the archaeological record In so doing rigid stereotypes are questioned and novel interpretations persuasively advanced Early Bronze Age pastoralism on the south Russian steppes did not consist exclusively of herding animals nor was it combined as it was later in the Iron Age with the pursuit of agriculture rather D Anthony and D Brown suggest that at least in the Samara river valley the herding of animals occurred along side the intensive gathering of wild nutritionally rich plants The *kalas* of ancient Chorasmia are not cities nor even proto urban formations but rather are large heavily fortified enclosures meant to repel attacks of armed nomadic cavalry They represent a continuation of a distinct Central Asian settlement pattern that began in the Bronze Age and that formed the center of a landscape divided into contiguous self contained oases The Mongols not only herded livestock but also farmed fished hunted and traded throughout the vast area that they had conquered uniting most of Eurasia into a single economically integrated system New perspectives proliferate throughout this richly detailed and extremely broad ranging collected volume

Phil Kohl Professor of Anthropology and the Kathryn W Davis Professor of Slavic Studies at Wellesley College

Social Orders and Social Landscapes is a stimulating addition to the still small literature in English making the rich datasets from the archaeology of Eurasia widely accessible to Western scholars The authors of the eighteen chapters analyze data from China to the Mediterranean from the fourth millennium BCE through the fourteenth

century CE with the tools of art and architectural history text analysis paleobotany and paleozoology and anthropological theory among others The product of a conference at the University of Chicago this book fulfils the goal of the graduate student organizers to apply interdisciplinary approaches to understanding the archaeology and history of the Eurasian landmass in local terms through a focus on oehow people lived in their local environments In the decade and a half since the end of the Soviet Union scholarly communication has broadened and the mutual influences have stimulated many new and thought provoking views on the Eurasian past This book is an exemplary product of the new scholarly discourse Karen S Rubinson Research Scholar Department of Anthropology Barnard College Columbia University **Minerva** ,2008 **The Guardian Index** ,1998 World Travel Guide ,2000 **Arts & Humanities Citation Index** ,2001 **Complete History of the World** R. J. Overy,Geoffrey Barraclough,2007 The Times Complete History of the World is the most comprehensive authoritative and accessible work on world history available today It has sold over 2 25 million copies since its first publication in 1978 With a narrative scope covering the origins of mankind right through to the turmoil of the 21st century this book is an unrivalled and breathtaking accomplishment Containing over 600 maps and charts with internet links throughout its pages bring history to life **Anthropology of the Indo-European World and Material Culture** Marco V. García Quintela,Francisco Javier González García,Felipe Criado Boado,2006 This book explores the interest of one inroad which does not belong to any one individual organized school or academic group operating today At its root lies an attempt to bridge a gap using proposals that were common tender in the 1930s and 40s when a series of scholars from different countries and scientific backgrounds had no qualms about turning to sociology or anthropology or even psychoanalysis in order to interpret the physical and material cultural features as well as religious mythical and ritual features of the different peoples who were the historical successors of the Indo Europeans 18 papers in English and French **Pastoralist Landscapes and Social Interaction in Bronze Age Eurasia** Michael David Frachetti,2009-01-05 Offering a fresh archaeological interpretation this work reconceptualizes the Bronze Age prehistory of the vast Eurasian steppe during one of the most formative and innovative periods of human history Michael D Frachetti combines an analysis of newly documented archaeological sites in the Koksu River valley of eastern Kazakhstan with detailed paleoecological and ethnohistorical data to illustrate patterns in land use settlement burial and rock art His investigation illuminates the practical effect of nomadic strategies on the broader geography of social interaction and suggests a new model of local and regional interconnection in the third and second millennia B C E Frachetti further argues that these early nomadic communities played a pivotal role in shaping enduring networks of exchange across Eurasia **The Golden Deer of Eurasia** Metropolitan Museum of Art (New York, N.Y.),2000 Spectacular works of art were excavated between 1986 and 1990 from burial mounds at Filippovka in Russia on the border of Europe and Asia The objects were created from about the fifth to the fourth century B C by pastoral people who lived on the steppes near the southern Ural Mountains The large funerary deposits include wooden deerlike

creatures with predatory mouths and elongated snouts and ears overlaid with sheets of gold and silver as well as gold attachments for wooden vessels and gold and silver luxury wares imported from Achaemenid Iran. These treasures are now in the collection of the Archaeological Museum Ufa in the Russian republic of Bashkortostan. The discoveries at Filippovka open a new chapter in the history of the material culture of the nomads who in the first millennium B.C. traversed the steppe corridor extending from the Black Sea region to China. Yet the information provided by the Filippovka excavations is complicated and ambiguous. The identity of the people represented by the finds remains uncertain but the forms and ornamentation of many works from Filippovka as well as the cemetery's location in the southern Urals argue for the cultural chronological designation of this material as Early Sarmatian. Stylistic features however point also to the arts of Siberia, Central Asia and China in the east and to the art of the Meotian Scythians in the west. Imported Achaemenid goods raise questions about their place of production and about the circumstances that brought them to be included in tombs on the southern Ural steppes. Finally robbers penetrated the burials in antiquity destroying much of the evidence necessary for understanding the Filippovka nomads' religious and funerary practices. These are among the issues addressed in this volume: the catalogue for an exhibition at The Metropolitan Museum of Art that brings together the remarkable new material from Filippovka and from the incomparably rich collections of the State Hermitage, Saint Petersburg, related luxury objects found in graves of other Eurasian steppe tribes. Gold and silver objects from the Scythian Black Sea tombs, textiles and leather and wooden works from the Altai Mountains and gold and bronze pieces from the Caucasus, Central Asia and Siberia illustrate developments in the art of the steppes in the centuries preceding the Filippovka burials, in contemporary societies and in later centuries toward the turn of the first millennium B.C. These outstanding works not only place the Filippovka discoveries in their proper historical and cultural context but are themselves fascinating and enigmatic.

The Urals and Western Siberia in the Bronze and Iron Ages Ludmila Koryakova, Andrej Vladimirovich Epimakhov, 2014-03-24

This book is the first synthesis of the archaeology of the Urals and Western Siberia. It presents a comprehensive overview of the late prehistoric cultures of these regions which are of key importance for the understanding of long term changes in Eurasia. At the crossroads of Europe and Asia the Urals and Western Siberia are characterized by great environmental and cultural diversity which is reflected in the variety and richness of their archaeological sites. Based on the latest achievements of Russian archaeologists this study demonstrates the temporal and geographical range of its subjects starting with a survey of the chronological sequence from the late fourth millennium BC to the early first millennium AD. Recent discoveries contribute to an understanding of issues such as the development of Eurasian metallurgy, technological and ritual innovations, pastoral nomadism and its role in Eurasian interactions and major sociocultural fluctuations of the Bronze and Iron Ages.

Reconstruction of the Bronze Age of the Caspian Steppes N.

I. Shishlina, 2008 This volume presents a synthesis of existing work on the Bronze Age of the Caspian Steppes. In particular, Natalia Shishlina evaluates the data for funeral rites and their material culture, identifying different cultures and proposing a chronology for cultural change in the region.
