**Insurance in Elizabethan England** Guido Rossi (Law teacher),2016 Examines the origins of English insurance focusing on the first English insurance code and its proximity to continental mercantile practice [Insurance in Elizabethan England](#) Guido Rossi,2016-12-15 English insurance came into being almost entirely during the Elizabethan period However the Great Fire of 1666 consumed most of London s mercantile document and therefore little is known about early English insurance Using new archival material this study provides the first in depth analysis of early English insurance It focuses on a crucial yet little known text the London Insurance Code of the early 1580s and shows how London insurance customs were first imported from Italy then influenced by the Dutch and finally shaped in a systematic fashion in that Insurance Code The London Insurance Code was in turn heavily influenced by coeval continental codes This deep influence attests the strong links between English and European insurance and questions the common civil law divide on the history of commercial law

transformations of childhood and political sovereignty during the age of Shakespeare changes spectacularly dramatized by the playwright himself Shakespeare's works feature far more child figures and more politically entangled children than other literary or theatrical works of the era Campana delves into this rich corpus to show how children and childhood expose assumptions about the shape of an ideal polity the nature of citizenship the growing importance of population and demographics and the question of what is or is not human As our ability to imagine viable futures on our planet feels ever more limited and as children take up legal proceedings to sue on behalf of the future it behooves us to understand the way past child figures haunt our conversations about intergenerational justice Shakespeare offers critical precedents for questions we still struggle to answer

**Plotting Early Modern London** Dieter Mehl, 2017-03-02 With the publication of Brian Gibbons's Jacobean City Comedy thirty five years ago the urban satires by Ben Jonson John Marston and Thomas Middleton attained their official status as a Renaissance subgenre that was distinct by its farcical humour and ironic tone from citizen comedy or London drama more generally This retrospective genre building has proved immensely fruitful in the study of early modern English drama and although city comedies may not yet rival Shakespeare's plays in the amount of editorial work and critical acclaim they receive both the theatrical contexts and the dramatic complexity of the genre itself and its interrelations with Shakespearean drama justly command an increasing level of attention Looking at a broad range of plays written between the 1590s and the 1630s master pieces of the genre like *Eastward Ho* *A Trick to Catch the Old One* *The Dutch Courtesan* and *The Devil is an Ass* blends of romance and satire like *The Shoemaker's Holiday* and *The Knight of the Burning Pestle* and bourgeois oddities in the Shakespearean manner like *The*

London Prodigal the twelve essays in this volume re examine city comedy in the light of recently foregrounded historical contexts such as early modern capitalism urban culture the Protestant Reformation and playhouse politics Further they explore the interrelations between city comedy and Shakespearean comedy both from the perspective of author rivalry and in terms of modern adaptations the twenty first century concept of popular Shakespeare above all in the movie sector seems to realign the comparatively time and placeless Shakespearean drama with the gritty noisy and bustling urban scene that has been city comedy s traditional preserve
