Digital Freedom Narain D. Batra, 2007-07-27. In *Digital Freedom* N. D. Batra explores the tension between the boundlessness of the Internet and the boundaries of the marketplace as well as the resulting impact on human expression, privacy and social controls. *Digital Freedom* is an exploration of and meditation on the question: How much freedom does a person need? The question evokes

Tolstoy's parable: How much land does a man need? Is freedom an acquired taste much like one's love for symphony orchestra? Or is it a necessity? After all, civilizations in the past have produced monumental works in all fields of human endeavor without as much obsession with individual freedom as we have today. Digital Freedom explores these issues, including surveillance, intellectual property, and copyright, from the perspective of an evolutionary self-organizing social system. This system both creates and assimilates innovations and in the process undergoes reorganization and renewal.

An ongoing case featuring Enron encourages students to consider how all OB topics tie together and practice applying key concepts. Call out quotes from managers appear at appropriate points throughout the text to highlight relevant real world examples. Building Managerial Skills exercises require students to consider different workplace situations from a manager's standpoint and determine a suitable course of action for each scenario.
