presented and discussed The focus is on the double wishbone and suspension strut axles The design of wheel suspensions
starts with kinematic considerations leads via component design to considerations of the vehicle dynamics Ultimately the
maximum forces of the tires in the transverse and circumferential directions are to be exploited while keeping the vehicle
controllable Due to the detailed in depth presentation the work is just as suitable for the interested motorsport enthusiast as
it is for the engineer in practice who is dealing with questions relating to racing suspensions The formula material is
