## **Orthographic Drawing Exercise:**

*Participatory Practice in Space, Place, and Service Design* Kelly L. Anderson, Graham Cairns, 2022-10-18 Participatory Practice in Space Place and Service Design is premised on a belief in the importance of participatory practices in finding creative solutions to the plethora of problems we face today. It argues that engaging professions with the public in mutual exploration analysis and creative thinking is essential. It not only ensures better quality products, places, services and a greater sense of civic agency but also facilitates fuller access to them and the life opportunities they can unleash. This book offers a uniquely varied perspective of the myriad ways in which participatory practices operate across disciplines and how they impact the worlds and communities we create and inhabit. This book suggests that participatory practices are multi-disciplinary and relevant in fields as diverse as design, architecture, education, health care, sustainability and community activism to name a few of those discussed here. How do designed objects and environments affect wellness, creativity, learning and a sense of belonging? How do products and services affect everyday experience and attitudes towards issues such as sustainability? How does giving people a creative voice in their own education, services and built environments open up their potential and strengthen identity and civic agency? Addressing these questions requires a rethinking of relations between people, objects and environments; it demands attention to space, place and services.
