## OSTER® VERSA® PERFORMANCE BLENDER

The Power to Blend Everything

NOTE: For safety information, read the Important Safeguards in the user manual.  
This Guide is not a substitute for the Owner's Manual. Refer to this guide only after you have read the Owner's Manual thoroughly.  
Visit [www.osterusa.com](http://www.osterusa.com) to find your blender's owner's manual.

Congratulations on the purchase of your new Oster® Versa® Performance Blender! Here are a few quick tips to get you started, but please read all the instructions in the Instruction Manual to ensure proper use and performance.

If you have any comments, questions or inquiries about this revolutionary product, please call 1-800-334-0759.

### Getting Started

Before you get started, separate the tamper, lid, filter cap, and jar. Wash in warm, soapy water. Rinse and dry well. Unit will not operate unless the jar is fully seated on base. Please follow assembly instructions listed below.

Note – Do not put the jar in the dishwasher.

### Your Product Features and Assembly

#### Jar Sensor

The unit is supplied with a jar sensor. This will prevent the motor from starting if the jar is not properly placed on the base. The control knob must be in the "Off" position when the jar is placed on the base.

For your safety, if the jar is removed from the base during blending, the motor will shut off. This also applies even if slightly lifted unintentionally.

#### Control Panel

The control panel includes a speed dial, plus 3 programmed settings and pulse. To use the speed dial, simply turn it clockwise to choose from manual settings from "Low" to "High." To use the programmed settings, you must first activate by turning the speed dial counter-clockwise to the "Programmed/Pulse" setting. Then select which programmed setting you would like to use.

These settings have been optimized by time and speed to best blend most Smoothies, Soups, and Dips/Spreads. It will stop once the cycle is complete.

When the speed dial is turned to the "Programmed/Pulse" setting, the red light around the pulse button will flash to indicate the unit is ready to operate. Avoid contact with blades or moveable parts. Never operate the unit without the lid in place.

#### Tamper

The unit comes equipped with a tamper. This allows you to accelerate the process of very thick and/or frozen mixtures. If food is not circulating, remove the filter cap and use the tamper to press ingredients down into the blades.

#### Fuse/Overload Protection

If the unit stops working, the fuse/overload protection has kicked in. First turn speed dial to "Off" and unplug from the electrical outlet. Then, remove the jar from the base and free the blade of any food obstructions. **Wait 30-45 minutes for the unit to cool and then it will be ready to use again.** Next, press the external resettable fuse on the bottom on the base.

Note – Due to the power of the machine, it is normal for it to be fairly loud during operation.
