*Pharmacological Enhancements in the Military* Richard M. Heames, 2023-12-18 Human enhancement is a rapidly advancing field and the speed of advance of technology from being available to being used results in a delay to the ethics surrounding it This is true of pharmacological enhancement PCE as much as exoskeletons and human machine interfacing Ethical issues arising from human enhancement include autonomy safety and dignity The first two are the cornerstones of the ethics surrounding informed consent IC which emanated from the necessity to protect human subjects against the risks of research What remains unclear is how those risks are quantified who decides whether the risk is an acceptable one and whether IC is required This volume explores all these legal and ethical issues including the theory and history of IC and the role of military doctors

**Using the Law in Social Work** Robert Johns, Jacqueline Harry, 2025-12-12 A core function of social work is to assist empower and protect the most vulnerable in society requiring social workers to often make decisions in complex and challenging situations This book helps social workers understand their statutory duties keep up to date with relevant law legislation and legal processes and learn how to apply this knowledge to social work practice Using jargon free language it provides a grounding in legally appropriate rights based social work across services for children and families and child protection adult care law youth justice court work professional regulation and human rights

*The Status of Marine Fisheries in East Asia* Daniel Pauly, Cui Liang, Weiwei Xian, 2022-05-24 The fisheries of China generate the largest catch in the world However these fisheries are in generally bad shape notably due to lack of management systems based on rigorous studies on the dynamics of major stocks exploited by the fisheries of China and neighboring countries This could be mitigated at least in part by the systematic application of newly developed methods for evaluating the status of exploited fish stocks for use in data sparse situations focusing on methods for estimating maximum sustainable yield MSY from catch informed by a combination of biological knowledge on the species intrinsic rate of population increase  $r$  and carrying capacity  $k$  and what is known about the stock for instance relative abundance indicators e g catch per unit of effort The aim of this Research Topic is to create an outlet for the studies that will result from the application of these modern methods to exploited stocks of East Asian marine fish encouraging the rigorous evaluation of these stocks and providing a basis for their rebuilding as required especially for Chinese stocks This would lead to the creation of a cadre of fishery scientists knowledgeable in using the methods in question and interested in collaborating with colleagues in other regions with similar issues Focusing on East Asia will reinforce to readers in the West that these fisheries are not a sideshow to the more interesting fisheries in Europe or North America but a major source of seafood for people in East Asia Indeed the failure of these domestic fisheries would increase the impacts of distant water fisheries from East Asia in other parts of the world

*Strategic Cyber Deterrence* Scott Jasper, 2017-07-08 According to the FBI about 4000 ransomware attacks happen every day In the United States alone victims lost 209 million to ransomware in the first quarter of 2016 Even worse is the threat to critical infrastructure as seen

by the malware infections at electrical distribution companies in Ukraine that caused outages to 225 000 customers in late 2015 Further recent reports on the Russian hacks into the Democratic National Committee and subsequent release of emails in a coercive campaign to apparently influence the U S Presidential Election have brought national attention to the inadequacy of cyber deterrence The U S government seems incapable of creating an adequate strategy to alter the behavior of the wide variety of malicious actors seeking to inflict harm or damage through cyberspace This book offers a systematic analysis of the various existing strategic cyber deterrence options and introduces the alternative strategy of active cyber defense It examines the array of malicious actors operating in the domain their methods of attack and their motivations It also provides answers on what is being done and what could be done by the government and industry to convince malicious actors that their attacks will not succeed and that risk of repercussions exists Traditional deterrence strategies of retaliation denial and entanglement appear to lack the necessary conditions of capability credibility and communications due to these malicious actors advantages in cyberspace In response the book offers the option of adopting a strategy of active cyber defense that combines internal systemic resilience to halt cyber attack progress with external disruption capacities to thwart malicious actors objectives It shows how active cyber defense is technically capable and legally viable as an alternative strategy for the deterrence of cyber attacks
