Our Stories Essays On Life Death And Free Will:

Our Stories John Martin Fischer, 2009-05-06 In this collection of essays on the metaphysical issues pertaining to death the meaning of life and freedom of the will John Martin Fischer argues against the Epicureans that death can be a bad thing for the individual who dies He defends the claim that something can be a bad thing a misfortune for an individual even if he never experiences it as bad and even if he does not any longer exist Fischer also defends the commonsense asymmetry in our attitudes toward death and prenatal nonexistence we are indifferent to the time before we are born but we regret that we do not live longer Further Fischer argues against the immortality curmudgeons such as Heidegger and Bernard Williams that immortal life could be desirable and shows how the defense of the possible badness of death and the possible goodness of immortality exhibit a similar structure on Fischer's view the badness of death and the goodness of life can be represented on spectra that display certain continuities Building on Fischer's previous book *My Way* a major aim of this volume is to show important connections between issues relating to life and death and issues relating to free will More specifically Fischer argues that we endow our lives with a certain distinctive kind of meaning an irreducible narrative dimension of value by exhibiting free will Thus in acting freely we transform our lives so that our stories matter *Death's Values and Obligations: A Pragmatic Framework* Dennis R. Cooley, 2015-06-22 This book brings together the relevant interdisciplinary and method elements needed to form a conceptual framework that is both pragmatic and rigorous By using the best and often the latest work in thanatology psychology neuroscience sociology physics philosophy and ethics it develops a framework for understanding both what death is which requires a great deal of time spent developing definitions of the various types of identity in the moment and identity over time and the values involved in death This pragmatic framework answers questions about why death is a form of loss why we experience the emotional reactions feelings and desires that we do which of these reactions feelings and desires are justified and which are not if we can survive death and how whether our deaths can harm us and why and how we should prepare for death Thanks to the pragmatic framework employed the answers to the various questions are more likely to be accurate and acceptable than those with less rigorous scholarly underpinnings or which deal with utopian worlds *Narrative Identity, Autonomy, and Mortality* John J. Davenport, 2012-09-10 In the last two decades interest in narrative conceptions of identity has grown exponentially though there is little agreement about what a life narrative might be In connecting Kierkegaard with virtue ethics several scholars have recently argued that narrative models of selves and MacIntyre's concept of the unity of a life help make sense of Kierkegaard's existential stages and in particular explain the transition from aesthetic to ethical modes of life But others have recently raised difficult questions both for these readings of Kierkegaard and for narrative accounts of identity that draw on the work of MacIntyre in general While some of these objections concern a strong kind of unity or wholeheartedness among an agent's long term goals or cares the fundamental objection raised by critics is that personal identity cannot be a narrative since stories are artifacts made by

persons In this book Davenport defends the narrative approach to practical identity and autonomy in general and to Kierkegaard s stages in particular **Freedom, Responsibility, and Value** Taylor W. Cyr,Andrew Law,Neal A. Tognazzini,2023-11-22 This volume celebrates the career of John Martin Fischer whose work on a wide range of topics over the past 40 years has been transformative and inspirational Fischer s semicompatibilist view of free will and moral responsibility is perhaps the most widely discussed view of its kind and his emphasis on the significance of reasons responsiveness as the capacity that underlies moral accountability has been widely influential Aside from free will and moral responsibility Fischer is also well known for his work on freedom and foreknowledge the problem of evil the badness of death the meaning of life and the allure of immortality This volume gathers new essays by leading scholars on some of the major themes of Fischer s work and it also includes a new piece by Fischer in which he offers a systematic reflection on and defense of the motivations that have shaped his theorizing about moral responsibility Freedom Responsibility and Value will be of interest to scholars and students working on a variety of issues in metaphysics ethics and philosophy of religion

Social Theory and Practice ,2011 The Kierkegaardian Mind Adam Buben,Eleanor Helms,Patrick Stokes,2019-05-02 Soren Kierkegaard 1813 1855 remains one of the most enigmatic captivating and elusive thinkers in the history of European thought The Kierkegaardian Mind provides a comprehensive survey of his work not only placing it in its historical context but also exploring its contemporary significance Comprising thirty eight chapters by a team of international contributors this handbook is divided into eight parts covering the following themes Methodology Ethics Aesthetics Philosophy of Religion and Theology Philosophy of Mind Anthropology Epistemology Politics Essential reading for students and researchers in philosophy Kierkegaard s work is central to the study of political philosophy literature existentialist thought and theology

Desert Collapses Stephen Kershnar,2021-08-18 People consider desert part of our moral world It structures how we think about important areas such as love punishment and work This book argues that no one deserves anything If this is correct then claims that people deserve general and specific things are false At the heart of desert is the notion of moral credit or discredit People deserve good things credit when they are good people or do desirable things These desirable things might be right good or virtuous acts People deserve bad things discredit when they are bad people or do undesirable things On some theories people deserve credit in general terms For instance they deserve a good life On other theories people deserve credit in specific terms For instance they deserve specific incomes jobs punishments relationships or reputations The author s argument against desert rests on three claims There is no adequate theory of what desert is Even if there were an adequate theory of what desert is nothing grounds justifies desert Even if there were an adequate theory of what desert is and something were to ground it there is no plausible account of what people deserve Desert Collapses will be of interest to researchers and advanced students working in ethics and political philosophy 2010 Redaktion Osnabrück,2011-06-16
