Thinking Outside the Box Gary R. Edgerton, Brian Geoffrey Rose, 2005-01-01 *Thinking Outside the Box* brings together some of the best and most challenging scholarship about TV genres exploring their genesis their functions and development and the interaction of disparate genres The authors argue that genre is a process rather than a static category and that it signifies much about the people who produce and watch the shows In addition to

The Television Revolution Maarten Dings, 2007 [Here Is Television](#)

Thomas H. Hutchinson, 2015-08-04 Excerpt from *Here Is Television* Your Window to the World The author of this book has helped to shape the beginnings of television the newest of the instruments available to those in the future who seek to inform the minds of men or to win their sympathy and understanding It takes imagination and daring to leave the security of a known medium to explore through trial and error with tools which are often anachronisms as soon as used a new medium which has a limited audience no traditions no certainties of technique It was in part this same imagination which led the author to teach what was perhaps the first University class in Television Programming Offered by the Washington Square Writing Center of New York University in the fall of 1940 this course has been conducted each semester since that time with the exception of a brief period during the war and this volume is an expansion of these lectures discussions and demonstrations It is of special interest that this book grows out of teaching and will be widely purchased and used as a textbook With television admittedly in its infancy as an industry and as an art form why it may be asked should we presume to teach the techniques of television programming The answer is that we have a tradition of demanding that our best doctors artists and scientists shall teach us who seek to follow in their steps Happily most creative people are genuinely interested in helping us to share whatever secrets of technique or knowledge they possess Moreover the wisest of them realize that teaching benefits both him who learns and him who teaches The task of communicating what one knows or has done is in itself clarifying We do not have knowledge in its fullest realization until we have attempted to express it to communicate it to others Thus it is fortunate that when we as students seek to benefit from what pioneers in any field have learned knowledge itself is perfected in the very process of teaching About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work
