Automated Deduction - CADE-17 David McAllester, 2006-12-30 For the past 25 years the CADE conference has been the major forum for the presentation of new results in automated deduction. This volume contains the papers and system descriptions selected for the 17th International Conference on Automated Deduction CADE 17 held June 17-20 2000 at Carnegie Mellon University Pittsburgh Pennsylvania USA. Fifty three research papers and twenty system descriptions were submitted by researchers from fifteen countries. Each submission was reviewed by at least three reviewers. Twenty four research papers and fifteen system descriptions were accepted. The accepted papers cover a variety of topics related to theorem proving and its applications such as proof carrying code, cryptographic protocol verification, model checking, cooperating decision procedures, program verification and resolution theorem proving. The program also included three invited lectures: High level verification using theorem proving and formalized mathematics by John Harrison, Scalable Knowledge Representation and Reasoning Systems by Henry Kautz, and Connecting Bits with Floating Point Numbers. Model Checking and Theorem Proving in Practice by Carl Seger. Abstracts or full papers of these talks are included in this volume. In addition to the accepted papers, system descriptions and invited talks, this volume contains one page summaries of four tutorials and five workshops held in conjunction with CADE 17.
