

The diagram illustrates a neural network structure with five layers. The layers are represented by horizontal lines of different colors: brown (L1), black (L2), grey (L3), blue (L4), and green (L5). The input layer (L1) is brown and spans the entire width. The hidden layers (L2, L3, L4) are black, grey, and blue respectively, and are positioned in the center of the network. The output layer (L5) is green and is located at the bottom. Vertical lines of the same colors (brown, black, grey, blue, green) connect the corresponding layers, indicating the flow of data from L1 to L2, L2 to L3, L3 to L4, and L4 to L5. The diagram is centered on a white background with a thin black border.

## **Motor Control Manual:**

*Instructor's Manual, AC and DC Motor Control with Related Electrical Code* Gerald A. Moberg, 1991      [Electric Motor Control](#), 1975      **Electrical Motor Controls for Integrated Systems Applications Manual** Glen Mazur, 2009

Electrical Motor Controls for Integrated Systems Applications Manual includes hands on applications and activities that expand on the content presented in the textbook. The applications manual can be used as a stand alone training tool or in conjunction with the textbook. Applications present technical information about proper use, sizing, connection and troubleshooting of electrical motor control devices. Activities test for knowledge and use of technical information to install, maintain and troubleshoot electrical motor control devices and circuits.

Quizzes made up of multiple choice true false and completion type questions are provided for each part of each chapter. These serve as an excellent review of the material presented. Practical assignments are designed to give the student an opportunity to apply the information covered in the text in a hands on motor installation. The Constructor motor control simulation software is included as part of the manual. This special edition of the program contains some 45 preconstructed simulated motor control circuits constructed using both NEMA and IEC symbols. The Constructor analysis assignments provide students with the opportunity to test and troubleshoot the motor control circuits discussed in the text. The Constructor simulation engine visually displays power flow to each component and using animation and sound effects each component and using animation and sound effects each component will react accordingly once power is supplied *Principles of Electric Motors and Control* Gordon Fox, 1924 Stepping Motor Control Processor Reference Manual, 1980 **Electrical Motor Controls for Integrated Systems Applications** Glen A.
