Rebuilding resilient

and sustainable agriculture in Somalia (Full report) Food and Agriculture Organization of the United Nations, 2018-11-02 This report documents the pressures on Somalia's livestock and crop subsectors over the years but notes that there is a cause for optimism thanks to the country's resilience and resources. These include a variety of agroecological zones and vast tracts of arable land and areas suitable for livestock production which in turn can support markets, export trade and overall growth.

*The Atlas of Water* Maggie Black, 2016-09 Water may soon be one of our most valuable commodities. The growing demands made on a finite resource by an increasing number of people adopting urban lifestyles and western diets coupled with a changing and less predictable climate are putting pressure on the planet's freshwater supply as never before. By 2025 four billion people may be living in conditions of water stress. And even where water is plentiful the poor are unlikely to have ready access to a safe, cheap supply. The new edition of this timely atlas analyzes the latest thinking and emerging issues. Completely updated it maps the competing claims on limited water resources made by farmers, industrialists and householders and investigates the nature of the resource, its uses and abuses as well as the vexed question of how it can be managed equitably. Page 4 of the cover.

*Climate Change 2022 - Mitigation of Climate Change* Intergovernmental Panel on Climate Change (IPCC), 2023-08-17 This Working Group III contribution to the IPCC Sixth Assessment Report provides a comprehensive and transparent assessment of the literature on climate change mitigation. The report assesses progress in climate change mitigation options for reducing emissions and enhancing sinks. With greenhouse gas emissions at the highest levels in human history, this report provides options to achieve net zero as pledged by many countries. The report highlights for the first time the social and demand side aspects of climate mitigation and assesses the literature on human behaviour, lifestyle and culture and its implications for mitigation action. It brings a wide range of disciplines, notably from the social sciences, within the scope of the assessment. IPCC reports are a trusted source for decision makers, policymakers and stakeholders at all levels: international, regional, national, local and in all branches: government, businesses, NGOs.
