## **Motor Neuron Disease Research Progress:**

*Motor Neuron Disease Research Progress* Raffaele L. Mancini, 2008 The motor neuron diseases or motor neuron diseases MND are a group of progressive neurological disorders that destroy motor neurons the cells that control voluntary muscle activity such as speaking walking breathing and swallowing Neurological examination presents specific signs associated with upper and lower motor neuron degeneration Signs of upper motor neuron damage include spasticity brisk reflexes and the Babinski sign Signs of lower motor neuron damage include weakness and muscle atrophy Every muscle group in the body requires both upper and lower motor neurons to function It is a common misconception that upper motor neurons control the arms while lower motor neurons control the legs The signs described above can occur in any muscle group including the arms legs torso and bulbar region Symptoms usually present between the ages of 50 70 and include progressive weakness muscle wasting and muscle fasciculations spasticity or stiffness in the arms and legs and overactive tendon reflexes Patients may present with symptoms as diverse as a dragging foot unilateral muscle wasting in the hands or slurred speech This new book presents the latest research from around the globe

Research Progress in Motor Neurone Disease Frank Clifford Rose, 1984 Motor Neuron Disease P.N. Leigh, Michael Swash, 2012-12-06 Here is the first book to provide a comprehensive overview of the clinical pathological and research aspects of motor neuron disease MND The text contains all essential features of the anatomy physiology pharmacology and toxicology of the motor system a full description of MND and its variants as well as historical developments and a review of the current concepts and controversies This book comes at a time of increasing interest in neurodegenerative disorders and MND in particular It will prove a key reference book with an integrated overview of the field and will be indispensable to practicing neurologists researchers and all those with an interest in MND
