Location Awareness in the Age of Google Maps Rebecca Noone, 2024-07-12 Location Awareness in the Age of Google Maps explores the mundane act of navigating cities in the age of digital mapping infrastructures Noone follows the frictions routing through Google Maps categorising and classifying of spatial information Complicating the assumption that digital maps distort a sense of direction Noone argues that Google Maps location awareness does more than just organise and orient a representation of space it also organises and orients imaginaries of publicness selfsufficiency legibility and error At the same time Location Awareness in the Age of Google Maps helps to animate the ordinary ways people are challenging and refusing Google Maps vision of the world Drawing on an arts based field study spanning the streets of London New York London Toronto and Amsterdam Noone s encounters of asking for directions open up lines of inquiry and spatial scores that cut through Google s universal mapping project Location Awareness in the Age of Google Maps will be essential reading for information studies and media studies scholars and students with an interest in embodied information practices critical information studies and critical data studies The book will also appeal to an urban studies audience engaged in work on the digital city and the datafication of urban environments **The Map in the Machine** Luis F. Alvarez Leon, 2024-04-30

Digital technologies have changed how we shop work play and communicate reshaping our societies and economies To understand digital capitalism we need to grasp how advances in geospatial technologies underpin the construction operation and refinement of markets for digital goods and services In The Map in the Machine Luis F Alvarez Leon examines these advances from MapQuest and Google Maps to the rise of IP geolocation ridesharing and a new Earth Observation satellite ecosystem He develops a geographical theory of digital capitalism centered on the processes of location valuation and marketization to provide a new vantage point from which to better understand and intervene in the dominant techno economic paradigm of our time By centering the spatiality of digital capitalism Alvarez Leon shows how this system is the product not of seemingly intangible information clouds but rather of a vast array of technologies practices and infrastructures deeply rooted in place mediated by geography and open to contestation and change *Atlas of Science* Katy Börner, 2010-09-17
