

## Teorema dell'elettore mediano

se le preferenze individuali sono ad un solo massimo

se ogni individuo vota per l'alternativa meno lontana dalla preferita

allora la regola della maggioranza produce sempre un risultato

e il risultato corrisponde alle preferenze dell'elettore mediano

**Esempio:** un comitato di 13 persone:

6 con preferenze monotoniche decrescenti ( $\alpha$ -modali) (imprese)

7 con preferenze quadratiche (uni-modali) (famiglie)

**Significato politico:** nei sistemi democratici le posizioni di centro dello schieramento politico svolgono un ruolo importante
