**Global Mining and Mineral Industry Government Agencies and Organizations Directory Volume 1 Government Agencies, Organizations, Companies** IBP USA,      **Restructuring and Re-organization of the Iraqi Oil Ministry and State-owned Oil Companies for Maximum Economic Growth and National Development** Muhammed Abed

Mazeel, 2012 The first steps towards restructuring and reorganizing the institutions and legislation of the Iraqi oil and gas industry must include taking ownership of resources allocating acreages to Iraqi Kurdistan and neighbour states improving the transparency as well as governmental participation and fiscal principles It is important to provide an institutional framework that governs the operations of the industry including its functions structure powers and funding Operations in the upstream of the industry comprise licenses leases and contracts Other considerations covered are award processes right of governmental participation marginal fields indigenous companies termination and revocation of both licenses and leases matters on fees rents and royalties and finally provisions on Associated Natural Gas The legislation in the downstream sector focuses on licensing refining marketing and pricing of oil products transport logistics and facility management companies pipelines and depots The operating stocks and Iraq strategic stocks are also necessary The needs of the downstream natural gas include both technical and commercial licensing regulations and conditions as the network gas supply licenses transportation pipelines licenses and the whole sale market in addition to the possibility of third party access customer protection the pricing regime public service obligations competition and market regulation The legislation is an amendment to the existing Iraqi Technical Service Contracts TSC and Production Sharing Contracts Agreements PSC in Iraqi Kurdistan based on the need to create a new fiscal framework that takes various compelling issues into consideration It needs to capture the full gas value chain for taxation purposes in order to develop a fiscal regime for gas removed from oil and to create thereby a level playing field for all investors in gas and promoting the effective management of costs across the industry which in turn will maximize the government's take Other considerations revolve around the requirement to develop a fiscal system which responds to changes in price and to clarify inconsistencies or conflicts in the application of fiscal terms for oil and gas and finally to develop a fiscal rule of general application based on a body of expected fiscal laws Quality health safety and environment are missing elements in Iraq During the restructuring and reorganization of the institutions the QHSE should take on a major role in working with the aforementioned departments in the Oil Ministry and the operating companies The obligations of the state and international oil companies towards the state environmental regulations and public rules must be upheld according to the licensees lessees and contractors considering matters of abandonment decommissioning and disposal and their funding The various actors in the oil and gas production are obligated towards various communities in the oil producing region of the country with supporting community development providing employment opportunities compensation infrastructure protection and management of the environment as essential

components The Ministry of Oil remains a civil service outfit that is ill equipped to conceive and enact the required policies for such a complex and sophisticated industry Hence there is a strong need for principal and basic interaction between Federal Oil Ministry existing directorial and state oil companies Kurdistan Ministry of Energy and Natural Resources and private sector operatives This applies also to the reorganization and restructuring of Federal Oil Ministry existing directorial and state oil companies Iraqi National Oil Company and Iraqi National Gas Company

**Energy Structures and Environmental Futures** Torleif Haugland, Helge Ole Bergesen, Kjell Roland, 1998 This book examines the history and prospects of the European energy sector for the last twenty five and the next twenty five years The authors analysis is rooted in a careful examination of the factors that have shaped energy in Europe over the last quarter century its regulatory systems its corporate structures and its regulatory and environmental structures They conclude that whatever major changes may occur the structures of the twentieth century are not going to yield easily to economic internationalization nor to political environmentalism

computational explorations in magnetron sputtering - May 31 2022

web oct 31 2014 the book computational explorations in magnetron sputtering by e j mcinerney focuses on the modeling of sputtering process in magnetrons the author describes magnetron sputtering in several chapters starting with the design of magnets in the magnetron plasma physics sputtering process and ultimately to the deposition of

computational simulations on electron orbits in the magnetron - Oct 04 2022

web jun 1 1996 copyright 1996 published by eisevier science ltd introduction the characteristics of a magnetron sputtering system is to trap electrons in a magnetic field so that it maintains the plasma state at low voltage the electrons trapped by the magnetic field will ionize the neutral particles by collisions

**computational explorations in magnetron sputtering wolfram** - Sep 15 2023

web isbn 9780692289921 143 pp description magnetron sputtering is a widely used industrial process for depositing thin films pvd films are found in everything from the moisture barriers in potato chip bags to the interconnects of modern semiconductor devices this book walks you through the physics of magnetron sputtering in a step by step fashion
