Manual Of Instruction In The Use Of Dumb Bells, Indian Clubs, And Other Exercises Morris Bornstein, 2015-05-06. In the decades following the American Civil War, reformers championed the explosion of public gyms and fitness centres in cities all across the country. In the opinion of many reformers, being truly fit was not only of physical value but was also conducive to moral superiority. This manual by Morris Bornstein was one of numerous texts from this period that looked to instruct Americans in the use of Indian clubs and dumbbells, which continue to be popular and effective tools for exercise today. An interesting and informative book, this *Manual Of Instruction In The Use Of Dumb Bells Indian Clubs And Other Exercises* will appeal to those with an interest in fitness and would make for a worthy addition to collections of related literature. We are republishing this volume now in an affordable, modern, high-quality edition, complete with a specially commissioned new introduction on Indian clubs.

How to Get Strong William Blaikie,2015-11-11 This 1883 fitness classic is one of the first books ever written on the subject of training for strength It was the first book that many of our physical culture pioneers ever read on the subject and was the book that motivated a movement A must have in your bodily conditioning library I owe a great deal to your writings for they have been among the causes that made me realize the importance of proper bodily development

Theodore Roosevelt 1899 Despite the number of similar books which have been placed before the public since How to Get Strong was written this manual has remained a good seller in revised editions and altogether more than sixty five thousand copies have been sold Mr Blaikie who is now a well known New York lawyer is a Harvard graduate As early as 1868 he made a record by walking from Boston to this city a distance of two hundred and twenty five miles in four days and a half an amateur walking record which remained unbroken for a decade Brooklyn Life January 10 1903 Millions of our people pass their lives in cities and towns and at work which keeps them nearly all day in doors Many hours are devoted for days and years under careful teachers and many millions of dollars are spent annually in educating the mind and the moral nature But the body is allowed to grow up all uneducated indeed often such a weak shaky affair that it gets easily out of order especially in middle and later life and its owner is wholly unequal to tasks which would have proved easy to him had he given it even a tithe of the education bestowed so generously in other directions Not a few to be sure have the advantage in youth of years of active out door life on a farm and so lay up a store of vigor which stands them in good stead throughout a lifetime But many and especially those born and reared in towns and cities have had no such training or any equivalent and so never have the developed lungs and muscles the strong heart and vigorous digestion in short the improved tone and strength in all their vital organs which any sensible plan of body culture followed up daily would have secured It does not matter so much whether we get vigor on the farm the deck the tow path or in the gymnasium if we only get it Fortunately if not gotten in youth when we are plastic and easily shaped it may still be had even far on in middle life by judicious and systematic exercise aimed first to bring up the weak and unused parts and then by general work daily which shall maintain the equal development of the whole

The aim here has been not to write a profound treatise on gymnastics and point out how to eventually reach great performance in this art but rather in a way so plain and untechnical that even any intelligent boy or girl can readily understand it to first give the reader a nudge to take better care of his body and so of his health and then to point out one way to do it That there are a hundred other ways is cheerfully conceded If anything said here should stir up some to vigorously take hold of and faithfully follow up either the plan here indicated or any one of these others it cannot fail to bring them marked benefit and so to gratify The Author New York July 1883
