Origins Ariel Adrean Roth, 1998 Are the worlds of science and religion irreconcilable Has modern science with its theory of evolution disproved the biblical account of the origin of life If one accepts the biblical account of origins does one then have to reject science Scientist and Christian believer Ariel A Roth argues that taken together science and religion give us a more complete and sensible understanding of the world around us our place in it and our ultimate meaning and fate Roth examines such topics as the evidence for evolution and creation the Flood the strengths and limitations of the scientific method and the reliability of Scripture He concludes that the biblical model of a recent creation by God leaves fewer unanswered questions than either science's evolutionary model or any view between the two positions such as progressive creation or theistic evolution Back cover

In Six Days John Ashton, 2001-01-01 Why would any educated scientist with a PhD advocate a literal interpretation of the six days of creation Why indeed when only one in three Americans believes the Bible is the actual word of God and is to be taken literally word for word according to a recent Gallup poll Science can neither prove nor disprove evolution any more than it can creation Certainly there are no human eyewitness accounts of either However certain factors are present today which are capable of swaying one's beliefs one way or the other In this book are the testimonies of fifty men and women holding doctorates in a wide range of scientific fields who have been convicted by the evidence to believe in a literal six day creation For example meet The geneticist who concludes that there must have been 150 billion forerunners of modern man in order for the natural selection required by evolution to have taken place in the development of man The evidence for such vast numbers of prehistoric man is in dire shortage The orthodontist who discovered that European museum fossils of ancient man have been tampered with to adhere to evolution theories The geologist who studied under the late Stephen Jay Gould and literally cut the Bible to pieces before totally rejecting evolution All fifty of these scientists through faith and scientific fact have come to the conclusion that God's Word is true and everything had its origin not so very long ago in the beginning In Six Days

**Creation, Catastrophe & Calvary** John Templeton Baldwin, 2000 In this scientific age what difference does it make whether I believe the world was created in six literal days and that the world was destroyed by a global flood In answering these questions Creation Catastrophe and Calvary shows how these beliefs are related to key issues such as the forgiveness of our sins and Sabbath observance Foreword Introduction Meet the Authors An Angel's Worldview The Days of Creation in Genesis 1 A Second Creation Account Biblical Evidence for the Universality of the Genesis Flood The Grand Canyon and the Genesis Flood The Geologic Column and Calvary The Rainbow Connection Implications for an Evangelical Understanding of the Atonement Evolution A Theory in Crisis The Role of Creation in Seventh day Adventist Theology Science and Theology Focusing the Complementary Lights of Jesus Scripture and Nature

Creation: "Behold, it was very good." Richard Schaefer,2019-10-28 Author Richard A Schaefer was a lifelong communicator fascinated by stories and like any good journalist dug for the facts and verified sources exploring nagging questions such as Is creation or evolution more credible based on science and expert opinions This book truly represented a personal passion of looking at all sides of the CREATION vs EVOLUTION issue He called on many experts and theorists including Charles Darwin himself Surprisingly Darwin was far more skeptical of his own theories than are many PhDs today and admitted to significant holes in his logic Read for yourself as great thinkers explore the pros and cons of both theories and their variants
