everything but what the crab needs to put food in its mouth which Sacculina then consumes Single celled Toxoplasma gondii has an even more insidious role for it can invade the human brain and cause personality changes making its host less afraid and more prone to danger and a violent end so that in the carnage it will be able to move on to another host Finally Zimmer concludes that humankind itself is a new kind of parasite one that preys on the entire earth If we are to achieve the sophistication of the parasites on display here in vivid detail if we are to promote the flourishing of life in all its diversity as they do we must learn the ways nature lives with itself the laws of Parasite Rex Rhetorical Animals Kristian Bjørkdahl, Alex C. Parrish, 2017-11-30 For this edited volume the editors solicited chapters that investigate the place of nonhuman animals in the purview of rhetorical theory what it would mean to communicate beyond the human community how rhetoric reveals our brute roots In other words this book investigates themes that enlighten us about likely or possible implications of the animal turn within rhetorical studies The present book is unique in its focus on the call for nonanthropocentrism in rhetorical studies Although there have been many hints in recent years that rhetoric is beginning to consider the implications of the animal turn as yet no other anthology makes this its explicit starting point and sustained objective Thus the various contributions to this book promise to further the ongoing debate about what rhetoric might be after it sheds its long standing humanistic bias *Index de Périodiques Canadiens*, 2000 Report, 1975
