

Operating Systems: The Core of Digital Devices

Other research has demonstrated that the relationship between the number of different bacteria and the number of different antibiotic resistance genes is not always negative. In fact, some antibiotic resistance genes may be associated with specific bacterial species, providing an explanation for the presence of antibiotic resistance genes in some pathogenic bacteria. Considering a pathogen can be infected by other elements from the soil or living in soil, it is not surprising that the number of different antibiotic resistance genes in a single bacterium can be high.
