perspective through which to raise questions about globalization a perspective framed by the concepts of territory identity and culture This book reminds that global processes are a part of who we are and what we do and that these same processes carry with them the ethical questions of how to act in the world *Copycat Television* Albert Moran,1998 Television programme format transfer is the process whereby the basic idea or ingredient of a programme is used to produce a new version of the programme With Polyglot TV Albert Moran offers a detailed explanation of the process *Opening Up the Globalization Process* Nibal Khaled Bourisly,2000 **Games** Martine Piquet,Francine Tolron,1998 Macalester International ,1996 **Globalization, Americanization and British Muslim Identity** Saied Reza Ameli,2002 A study of the impact of globalization upon the construction of Muslim identity in the West in particular in Britain Drawing on a number of theoretical models it examines the way in which globalization generates paradoxically two parallel processes homogenization and heterogenization The former process is chiefly characterized by increasing Westernization while the latter is observable in the different forms that growing Islamic resistance has taken in Muslim societies worldwide By examining second generation young adults born in the UK of migrant Muslim parents and the extent to which the Western global cultural industry has influenced their identity the study suggests that through the process of heterogenization cultural forms have become diversified and fragmented and identify common construction is diffused *The Information Society* Robin Mansell,2009 The information society refers to a constellation of developments arising from the growing use of communication technologies in the acquisition storage and processing of information and the role of information in supporting the creation and exchange of knowledge Research on information societies really began to take off in the 1970s when Daniel Bell wrote about the information age While there were earlier works that focused on the growing importance of information in the economy it was not until the mid 1990s and the spread of the Internet that this field of study experienced a huge expansion across a broad range of disciplines in the social sciences and beyond A critical mass of scholarship has now accumulated establishing the information society and information societies as a terrain of substance and complexity the exploration and understanding of which requires increasingly sophisticated navigation skills As research in and around the area continues to flourish as never before this new title in Routledge s Major Works series Critical Concepts in Sociology meets the need for an authoritative reference work to make sense of a rapidly growing and ever more complex corpus of literature and to provide a map of the area as it has emerged and developed over the last thirty years or so The Information Society is fully indexed and has a comprehensive introduction newly written by the editor which places the material in its historical and intellectual context It is an essential work of reference and is destined to be valued by scholars and students as well as policy makers and practitioners in the field as a vital one stop research resource Publisher s website Confronting Twenty-first Century Challenges Ruth Mukama,Murindwa Rutanga,2004
