**Technology Play and Brain Development** Doris Bergen,Darrel R. Davis,Jason T. Abbitt,2015-08-27 Technology Play and Brain Development brings together current research on play development learning technology and brain development The authors first navigate the play technology and brain development interface highlighting the

interactive qualities that make up each component. Next they survey the changes in play materials and the variations in time periods for play that have occurred over the past 15-20 years and then explain how these changes have had the potential to affect this play-brain developmental interaction. The authors also cover various types of technology-augmented play materials used by children at age levels from infancy to adolescence and describe the particular qualities that may enhance or change brain development. In so doing they present information on previous and current studies of the play and technology interface in addition to providing behavioral data collected from parents and children of varied ages related to their play with different types of play materials. Significantly they discuss how such play may affect social, emotional, moral, and cognitive development and review futurist predictions about the potential qualities of human behavior needed by generations to come. The authors conclude with advice to toy and game designers, parents, educators, and the wider community on ways to enhance the quality of technology-augmented play experiences so that play will continue to promote the development of human characteristics needed in the future.

**A Disease Called Childhood** Marilyn Wedge, 2015-03-24 A surprising new look at the rise of ADHD in America, arguing for a better paradigm for diagnosing and treating our children. In 1987 only 3 percent of American children were diagnosed with attention deficit hyperactivity disorder, also known as ADHD. By 2000 that number jumped to 7 percent and in 2014 the number rose to an alarming 11 percent. To combat the disorder, two thirds of these children, some as young as three years old, are prescribed powerful stimulant drugs like Ritalin and Adderall to help them cope with symptoms. Meanwhile, ADHD rates have remained relatively low in other countries such as France, Finland, and the United Kingdom, and Japan, where the number of children diagnosed with and medicated for ADHD is a measly 1 percent or less. Alarmed by this trend, family therapist Marilyn Wedge set out to understand how ADHD became an American epidemic. If ADHD were a true biological disorder of the brain, why was the rate of diagnosis so much higher in America than it was abroad? Was a child's inattention or hyperactivity indicative of a genetic defect, or was it merely the expression of normal behavior or a reaction to stress? Most important were there alternative treatments that could help children thrive without resorting to powerful prescription drugs? In an effort to answer these questions, Wedge published an article in *Psychology Today* entitled "Why French Kids Don't Have ADHD" in which she argued that different approaches to therapy, parenting, diet, and education may explain why rates of ADHD are so much lower in other countries. In *A Disease Called Childhood*, Wedge examines how myriad factors have come together, resulting in a generation addicted to stimulant drugs and a medical system that encourages diagnosis instead of seeking other solutions. Writing with empathy and dogged determination to help parents and children struggling with an ADHD diagnosis, Wedge draws on her decades of experience as well as up-to-date research to offer a new perspective on ADHD. Instead of focusing only on treating symptoms, she looks at the various potential causes of hyperactivity and inattention in children and examines behavioral and environmental as opposed to strictly biological treatments that have been proven to help. In the process, Wedge offers parents, teachers, doctors, and therapists a new paradigm for child mental

health and a better happier and less medicated future for American children *Illinois Reading Council Journal*, 2016
