

# WHAT IS REDSTONE?

## WHERE CAN I GET IT?

You can find redstone in various forms. It comes in 16 to 128 as normal redstone dust, or the decorative redstone ore consists of red dust blocks through which a basic circuit can flow. To mine the blocks, you'll need to use a sword or pickaxe to mine the ore, which will cause up to five pieces of redstone dust when it's destroyed.

One last bit of trivia: redstone is the primary conductor of circuits. In its purest form of redstone dust, it can be used to create many components, or forward a signal between them. If you want to automate and tinker in Minecraft, redstone is key.

## WHAT CAN I DO WITH A REDSTONE SIGNAL?

The various pieces of a redstone dust will create a signal that can be used to power adjacent blocks, including normal blocks, as well as those that have a redstone function (like repeaters, logic gates, etc.). If a signal is applied to a block that has a function, it will cause it to turn that block for as long as the signal is present.

## SO THERE'S AN ENDLESS POWER SUPPLY?

Not quite. It can last forever, but its strength decreases over time and its distance, which you'll learn more about later. The repeating blocks increase the signal power by 15%, and adjacent redstone dust, but that decreases by 1. For example blocks of redstone dust can be a Redstone torch can only power redstone dust for 15 blocks max.

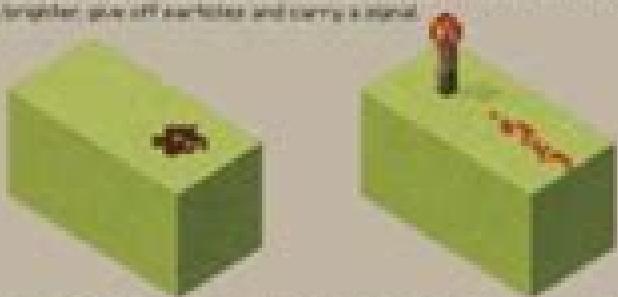

## IS THERE ANYTHING ELSE IT CAN DO?

That wasn't enough for you? Well fine, redstone dust can also used in conjunction to create redstone components such as repeaters, cross-over's, and other various other useful tools such as the basis of redstone and diagnostic structures, and other similar items such as switches and repeaters. Oh, and it can also be used in conjunction to increase the strength of an effect!

## WHAT CAN YOU DO WITH THE DUST?

Everything! If you place dust on top of a block, it will convert it to a dust block. But place a power source such as a redstone torch, power it, and it will become much stronger, give off particles and carry a signal.

But that's not all, of course. If you place redstone dust on adjacent blocks, they'll join together and reconfigure to carry the signal in one to four directions. Here are just a few of the configurations that you can make:
