

Legend

	Full Block
	Stair
	Ladder
	Fence
	3 layers of Snow
	Slab
	Trapdoor
	Ground Blocks
	Carpet

Slab Steps

Must have empty space in middle. Slabs can match palette of blocks. Only works in Bedrock or in Java 1.13 and earlier.

Carpet on top of a bottom Slab

Lots of color combinations. Slabs to build. Easy to break by mistake.

Trench

Can be made without any blocks. Very useful, very sneaky in the game. Can be very dangerous if you fall in and don't leave an easy way out, such as a ladder. Must run-jump to get across.

Two High Wall with Ladder

Put ladder on top block. Put carpet on top to prevent mob squeeze. Can blend in with building block palette. Requires more resources. Slower to get over than other methods.

With Jump Boost I - beacon or potion

Fence on Wall

Slab on top of a full block

Carpet on top of Fence or Wall. Slabs to build. Many color choices.

Trapdoor on top of Fence or Wall. Slabs to build. Colors can match fences.

Carpet on top of Carpet

Easy to build and take down. Lots of color choices. Can be broken easily by mistake.

Trapdoor on top of a bottom slab

Trapdoors can match other wood in your build. Slabs to build. Trapdoors can open by mistake which could allow mobs to pass.

Ha-Ha Trench - one way mob access. Holes can go across in one direction but not the other. Can be made without any blocks. Very useful, sneaky in game to keep farm animals contained without using resources. Can be dangerous if you fall in and can't jump out quickly. Must run-jump to get across.

Snow in front of Fence or Wall

Three levels of snow will allow you to jump over a fence or a wall. Shouldn't be used where snow will melt.

With Jump Boost II beacon or potion

Carpet on top of a two full block wall

Slab on top of two full blocks

BARRIERS THAT YOU CAN GET OVER THAT MOST MOBS CAN'T

Are you tired of trying to open and then close a fence gate before a mob can get to you? Great way to keep animals from getting loose. Spiders will be able to get over these barriers. Plan accordingly!

If you have beacons in your area, using a Jump Boost can really expand the possibilities of getting over walls easily.

Try combining different solutions with regular walls, fences, or taller block sections to enhance a build.

Placing trapdoors on top of slabs in the correct orientation will allow you open two of them to allow mobs to get through when needed.

Minecraft: Minecraft Building Guide: Ultimate Blueprint Walkthrough Handbook: Creative Guide to Building Houses, Structures, and

Constructions with Building Ideas and Tips Drake Craft,2016-09-20 Never Build an Ugly House Again by Using Blueprints

Want easy to follow image based blueprints to use when building your Minecraft houses and structures Remember the first day in Minecraft You are rushing to find materials find coal and build a shelter before you get attacked by creepers and skellies

Typically you build a house so quickly that it ends up being a hole in the dirt or a 5x5 cube made of dirt Either way it ends up looking TERRIBLE You continue to slowly gather materials and block by block build your house to look better and better But unfortunately it never looks that awesome It doesn t turn into something that you re proud of and want to see everyday because you didn t start with a plan or design in mind This is at least what happened to me in my Minecraft worlds

If I didn t have a well thought out plan beforehand my house would never turn out as well as I wanted That s why I have created a series of blueprints that tells you exactly how to build the house you want Layer by layer we clearly show where to place each block and how many of each block you need Here s how it works We give you a variety of different houses to choose from all with their own unique styles and complexities Take a moment to search through the different options we provide completed pictures for you to choose from You jump to the picture of the house you like the best and want to build

Once you pick your house we will tell you what materials you need and how many blocks of each material you need to collect From there start collecting materials or start building in creative Or you can start building with what you have and collect materials along the way From there the construction of the house is crazy simple We start with layer 1 Each layer of the

house is shown to you with a bird s eye view so you can clearly see which block goes where Each photo is complemented with a descriptive text version of what you need to do in that layer Then step by step layer by layer we will build the house to the top These blueprints were designed to be as clear and easy to follow as possible Because building a well designed house is hard work Finding all of the materials along with knowing what to use at which time can get confusing That s why you should start with a plan design and goal in mind This is especially relevant if you are playing multiplayer Don t be that player that builds the ugly house on the block Build something amazing that other players are jealous of and compliment you for The days of ugly houses are OVER It s time to get started and get excited about your new Minecraft home Just listen to what our other Minecraft readers have to say This ebook is amazing The images display what you need to construct so clearly Building the house was so simple and it looks better than everyone else s on our server Tim G Drake PLEASE MAKE MORE

BLUEPRINTS I always built awful houses and could never be happy with them or figure out how to improve them Now I m really happy with the village I built John S Keep it up and keep them coming Drake Craft Another great series of houses to build I m super excited Whitney M Happy Crafting [Unofficial Minecraft Tin Of Books](#) ,2016-09-01 **Ultimate**
