Heath, 2025-09-08 A practical guide for teachers and students navigating the complicated intersection of artificial intelligence, education, and justice. Artificial intelligence is rapidly integrating into today's classrooms, but unlike other new technologies, AI has the potential to harm, making it difficult to take advantage of its benefits. In *Critical AI in K-12 Classrooms*

Stephanie Smith Budhai and Marie K Heath draw attention to the biases embedded within AI algorithms such as those powering OpenAI's ChatGPT and DALL-E to guide students and teachers in developing strategies to best incorporate AI or not into equitable learning. AI's reliance on existing data and knowledge systems means Black queer those with disabilities and other marginalized students are at greater risk of being harmed by built-in limitations and bias. Budhai and Heath show how to circumvent if not actively resist such harms as machine learning NLPs, LLMs, and GenAI enter the classroom with practical examples rooted in culturally sustaining abolitionist and fugitive pedagogies across disciplines. Their practical guide creatively answers the concerns of educators committed to forward thinking yet fair instruction and the needs of students eager to use AI for just ends. *Critical AI in K-12 Classrooms* meets the challenges of a key STEM technology with an eye toward cultivating a more just world. Balancing responsible learning with the joy of discovery, Budhai and Heath build a framework for AI instruction that all educators can confidently use. *Practical Archaeogaming* Andrew

Reinhard, 2024-05-03 As a sequel to *Archaeogaming: an Introduction to Archaeology in and of Video Games*, the author focuses on the practical and applied side of the discipline, collecting recent digital fieldwork together in one place for the first time to share new methods in treating interactive digital built environments as sites for archaeological investigation. Fully executed examples of practical and applied archaeogaming include the necessity of a rapid archaeology of digital built environments, the creation of a Harris matrix for software stratigraphy, the ethnographic work behind a human civilization trapped in an unstable digital landscape, how to conduct photogrammetry and GIS mapping in procedurally generated space, and how to transform digital artifacts into printed three-dimensional objects. Additionally, the results of the 2014 Atari excavation in Alamogordo, New Mexico, are summarized for the first time. *Narratives of Hope in Times of Change* Nina Bonderup

Dohn, Maria Cutajar, Carmel Borg, Thomas Ryberg, Maarten de Laat, 2026-02-11 This book develops selected papers from the 14th International Networked Learning Conference (NLC 2024) hosted by the University of Malta.
