**in Early Medieval Wales** Rhiannon Comeau, 2020 This study examines the structure of the early medieval Welsh landscape Using a cantref hundred in south west Wales as a case study it draws on a multidisciplinary comparative analysis to overcome the limits imposed by restricted material culture survival and limited written sources It examines the patterns of power and habitual activity that defined spaces and structured lives and considers the temporal relationships both seasonal and longue dur e that shaped them Four key findings are presented Firstly that key areas of early medieval life agriculture tribute payment legal processes and hunting were structured by a longstanding seasonal patterning that is preserved in twelfth and thirteenth century Welsh law church and well dedications and fair dates Secondly it presents at cantref level the first systematic survey of assembly site evidence in Wales and sets it in comparative context Thirdly it demonstrates that though poor material culture preservation and limited written records have hitherto restricted identification and characterisation of key locations in the early medieval Welsh landscape a multidisciplinary dataset allows effective identification of focal zones through indicators known from other areas of north west Europe Fourthly the widely used multiple estate model is found to be an inadequate descriptor of the early medieval Welsh landscape An alternative approach is proposed Methodologically it demonstrates the value of a multidisciplinary approach especially the systematic use of place names which is novel in a Welsh context It also provides key resources for other researchers by geolocating pre 1700 place names from a previously published survey creating GIS resources polygons and geolocated databases from the 1840s tithe map and schedules for parishes in its detailed case study areas and providing a geolocated database of 16th century demesne and Welsh law landholdings in the cantref English Medieval Shrines John Crook, 2011 The cult of saints is one of the most fascinating manifestations of medieval piety It was intensely physical saints were believed to be present in the bodily remains that they had left on earth Medieval shrines were created in order to protect these relics and yet to show off their spiritual worth at the same time allowing pilgrims limited access to them English Medieval Shrines traces the development of such structures from the earliest cult activities at saintly tombs in the late Roman empire through Merovingian Gaul and the Carolingian Empire via Anglo Saxon England to the great shrines of the fourteenth and fifteenth centuries The greater part of the book is a definitive exploration on a basis that is at once thematic and chronological of the major saints cults of medieval England from the Norman Conquest to the Reformation These include the famous cults of St Cuthbert St Swithun and St Thomas Becket and lesser known figures such as St Eanswyth of Folkestone or St Ecgvine of Evesham John Crook an
