Ann Bartel,2005 This study presents new empirical evidence on the relationship between investments in new computer based information technology IT and productivity by investigating several plant level mechanisms through which IT could promote productivity growth We have assembled a data set on plants with a common production technology in a narrowly defined industry valve manufacturing to study the effects of new IT on product innovation production process improvements employee skills and work practices The homogeneity of the plants production processes within this narrowly defined industry together with the estimation of longitudinal models eliminate many sources

of unmeasured heterogeneity that could confound productivity comparisons in more aggregate data and in broader samples The three main results of this study highlight how the adoption of new IT enhanced machinery involves much more than just the installation of new equipment on the factory floor We find that adoption of new IT enhanced equipment 1 alters business strategies moving valve manufacturers away from commodity production based on long production runs to customized production in smaller batches 2 improves the efficiency of all stages of the production process with reductions in setup times supporting the change in business strategy and 3 increases the skill requirements of workers while promoting the adoption of new human resource practices National Bureau of Economic Research web site Stagebill ,1989 New York Magazine ,1986-07-21 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea The New York Times Index ,1975 New York ,2006-06 Marquee ,1976 **The American Organist** ,2003 The A.W.A.
