Diversity and Inclusion-Driven Marketing for Multicultural Marketplaces Tarnanidis, Theodore, Sousa, Bruno, Vlachopoulou, Maro, Papachristou, Evridiki, Kittu Manda, Vijaya, 2025-10-01 In today's economy diversity and inclusion are effective marketing practices for brands wanting to authentically connect with the multicultural marketplace. As consumer demographics grow and evolve, businesses must embrace inclusive strategies that reflect the values and experiences of diverse communities. Effective multicultural marketing helps with representation and fosters engagement, ensuring products and messaging resonate with a broad spectrum of cultural backgrounds. By prioritizing inclusivity, companies can enhance brand loyalty and trust while driving innovation and expanding their market reach in an increasingly interconnected world. *Diversity and Inclusion-Driven Marketing for Multicultural Marketplaces* explores the importance of diversity and inclusion in marketing for consumer wellbeing. It pinpoints the actions taken by individual organizations and marketers and examines policies and actions integrated in both education and marketing practice. This book covers topics such as marketing diversity and inclusion and gender bias and is a useful resource for academicians, business owners, researchers, consultants, policymakers, and data scientists.

EBOOK: Principles and Practices of Marketing 10/e JOBBER AND ELLI, 2023-02-21

EBOOK Principles and Practices of Marketing 10 e **Running with Power: Why Would You?** Steve Bateman, 2024-03-22 Is power the next great running metric? Power, which measures your effort, how hard you're running, is becoming more popular. All of the major running watch manufacturers include wrist-based power in their new models, and the number of runners using power in the World Marathon Majors has doubled every year since 2016. Running with Power, you can Run your Personal Best based on your measured fitness, not just a hopeful finish time. Maximise your training gains while minimising injury risk. Improve your fatigue resistance to run harder for longer. Measure the effectiveness of drills, plyometrics, or strength work. Power may be the next great running metric. But that isn't what this book is about. This book answers the question: Why would you Run with Power? Written by an England Athletics certified coach who's been using power since 2018, it explores what running with power is, what's different about power, and the benefits why you should use it. Running with Power is based on decades of research and practice, packaged as a set of powerful models and metrics that can be used to guide your training and racing more effectively than Heart Rate or Pace. All of which leads to the question: Why wouldn't you Run with Power?

Value Co-Creation in Web 3.0 Robin Qiu, 2026-01-01 This book explores the architecture and framework for co-creating the most valuable and promising data in the future Internet, often referred to as Web 3.0, from the end user's perspective. Unlike the current platform economy, where user's daily usage and activity data is predominantly held by individual organizations, Web 3.0 advocates for decentralized data management across interconnected platforms. This approach aims to fully utilize the vast amounts of data generated by the increasingly connected physical world. The book explains how Web 3.0 can be developed with fundamental and technological support to enhance decentralized data

management and maximize benefits for end users. Additionally, it presents two use cases to illustrate how value co-creation can be achieved using Web 3.0. The book is aimed primarily at students from business and engineering schools. It also serves as a valuable teaching resource for instructors in management information systems, MIS, information systems, information science, and technology and data and computing sciences. Additionally, professionals interested in digital transformation, blockchain technology, data analytics, AI, and digital economy policymaking will find it highly relevant.
