The Google Drive Trick Keeps My Files Perfectly Organized

Google Drive is a great way to store and organize your files, but it can be easy to lose track of them if you have a lot of them. One trick that can help is to use a specific folder structure. For example, you could create a folder for each project and then subfolders for each type of file. This way, you can easily find what you need when you need it. Another trick is to use Google Sheets to keep track of your files. You can create a spreadsheet where you list all of your files and their locations. This can be especially helpful if you work with a team and need to share files. Finally, don't forget to use Google's search feature. You can search for specific files by name or by content, which can save you a lot of time.
