**Uberland** Alex Rosenblat,2018-10-23 Silicon Valley technology is transforming the way we work and Uber is leading the charge An American startup that promised to deliver entrepreneurship for the masses through its technology Uber instead built a new template for employment using algorithms and Internet platforms Upending our understanding of work in the digital age Uberland paints a future where any of us might be managed by a faceless boss The neutral language of technology masks the powerful influence algorithms have across the New Economy Uberland chronicles the stories of drivers in more than twenty five cities in the United States and Canada over four years shedding light on their working conditions and providing a window into how they feel behind the wheel The book also explores Uber s outsized influence around the world the billion dollar company is now influencing everything from debates about sexual harassment and transportation regulations to racial equality campaigns and labor rights initiatives Based on award winning technology ethnographer Alex Rosenblat s firsthand experience of riding over 5 000 miles with Uber drivers daily visits to online forums and face to face discussions with senior Uber employees Uberland goes beyond the headlines to reveal the complicated politics of popular technologies that are manipulating both workers and consumers [Unravelling Modern China](#) Haico Ebbers,2019-04-05 This book provides a comprehensive and balanced view of the main transformations that are happening in the Chinese economy today This view has developed from more than 200 interviews and numerous surveys based on primary data in

addition to mainstream literature by academia and consultancy companies The general view of China is often either black or white Global markets are generally guided by euphoria or fear Academia are optimistic or pessimistic about China s longer term growth potential People believe or distrust Chinese data These black and white pictures are in many cases easy to communicate and even proved by anecdotic evidence but are not correct Modern China is not the result of tradeoffs but ambiguities market driven AND government driven central government AND local government control increasing brand loyalty AND extreme price sensitivity fall of consumption as percentage of GDP AND strong increase in consumption export as an important driver behind longer term development AND yet hardly visible as a determinant of today s economic growth The aim of this book is to help readers understand the often conflicting nature of China not only from an economic point of view but also from political and social point of view In this sense it tries to give the reader an eclectic picture of China the country of contradictions That is a difficult task because of the linkages between reforms and the fact that there are many preconceived ideas of China its development and choices It is interesting to note that the further from China people are the more negative their views towards China This book will make clear that this pessimism is overdone In the longer term the author is quite positive about China s transformations believing that the rise of China is here to stay and that this is the major factor of change of this century     *Business 2.0* ,2003-02     **Between Two Worlds** Ellen Bassuk,Daniel Schoonover,2025-12-11 Anchored on the life long experiences of a mother who is a psychiatrist and her son who has been labeled with a serious mental illness Between Two Worlds describes a recovery oriented path to repairing the broken mental health system
