*Introduction to Information Systems* R. Kelly Rainer (Jr.), Brad Prince, Cristóbal Sánchez-Rodríguez, Sepideh Ebrahimi, Ingrid Splettstoesser, 2023-10-23 As digital transformation becomes increasingly central to effective corporate strategy today's students must learn how information systems provide the foundation for modern business enterprises. Known for its rich Canadian content and focus on active learning, *Introduction to Information Systems Sixth Canadian Edition* shows students how they can use IS to help their current or future employers increase profitability, improve customer service, manage daily operations and drive impact in their markets. This course demonstrates that IT is the backbone of any business, whether a student is majoring in accounting, finance, marketing, human resources, production operations management or MIS. In short, students will learn how information systems provide the foundation for all modern organizations, whether they are public sector, private sector, for profit or not for profit.

*Chinese Platforms* Jian Lin, Wilfred Yang, Wang, Ping Sun, 2025-12-10 The rise of the Chinese internet has reconfigured digital culture around the world. From social media platforms such as WeChat and Douyin to utility platforms Didi and Eleme, the Chinese platform economy has shown a remarkable capacity to innovate and grow, incurring constraints as well as receiving protection from the Chinese state. This is the first textbook to centre Chinese platforms in the transformation of the global internet. Offering an overview of the history, governance and social political implications, the book shows how Chinese platforms are situated within the domestic political economy of China and the external geopolitics and cross border mobilities of capital, technology and populations. Topics covered include policy and governance, social media, entertainment, e-commerce, digital labour and the Chinese diaspora. Comparing and contrasting the Chinese platform ecology with its global counterpart, the book argues that while Chinese platforms exhibit more effective economic and technological innovation and have strong cultural cachet, they are subject to a far greater degree of state oversight, including facilitation as well as correction and censorship. *Chinese Platforms* is a required reading for students of Media and Communication Studies and China Studies, as well as those interested in the rise of digital China and the implications for the global platform society.

Mayes,2005 There has been speculation but no definitive answer as to why many of the world s fastest middle and long distance runners are from Kenya Most of the fastest runners in Kenya come from only a few of the 42 tribes and amazingly several sub tribes account for a sizeable portion of those The Kenyans as they are frequently called are not homogenous but have tremendous cultural diversity Peak performance requires unique biological cultural and psychological factors Mayes argues that at this juncture in history Kenyans have the necessary components required to excel in professional running He breaks down each of these components and analyzes them and their interrelationships with other disciplines He also includes external factors such as Westernization globalization and modernization Mayes methodology is unique as he uses a cybernetic model called an ethnosystem With many misunderstandings about how Kenyans see and do things there still remains a great need for education about Kenyan culture A number of disciplines remain fertile areas for discussion in relation to Kenyan running Among those are new science psychological anthropology belief and knowledge systems African philosophy sociobiology and social Darwinism Mayes also addresses hurdles to acquiring the necessary knowledge including taboos religious fundamentalism scientific and institutional dogma and ethnocentrism
