Quality Rankings of American Colleges and Universities David S. Webster,1986 The Alumni Factor The Alumni
Factor,2013-09-10 This book began with a simple premise that there is a better way to assess and rank colleges and

universities in America than those currently being offered The primary outcomes of most of today's rankings are 1 To provide readers a view of what life is like as an undergraduate and 2 To give insight into who comes into the college The Alumni Factor on the other hand is more interested in who comes out The aim of this guide is to describe how well a college or university actually develops and shapes its students and what becomes of them after they graduate The Alumni Factor is interested in the actual outcomes experienced by college graduates and the role their college played in creating those outcomes The Alumni Factor believes this information regarding graduate outcomes is truly essential to understanding and assessing our colleges and universities today In line with these goals The Alumni Factor provides a detailed in depth profile of graduates from 225 of our nation's top colleges The profiles were constructed almost entirely with data and insights from the actual college alumni themselves Readers will find The Alumni Factor to be a fascinating look at the incredibly diverse academic social and cultural choices available to capable students today Educational Rankings Annual 2005 Gale Group, 2004-09 This up to date resource presents more than 4 000 national regional local and international lists and rankings compiled from hundreds of respected sources Entries typically include a description of the ranking background information on criteria for establishing the hierarchy additional remarks about the ranking the complete or partial if extensive ranking and a complete source citation for locating additional information if necessary **Educational Rankings Annual 2006** Westney, Lynn C.  more **Breaking Ranks** Colin Diver, 2022-04-12 Some colleges will do anything to improve their national ranking That can
 be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the
 rankings industry has become a self appointed judge declaring winners and losers among America's colleges and universities
 In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree
 and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing
 colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual
 rigor and social mobility that is the genius of American higher education As a former university administrator who refused to
 play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial
 aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher
 education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he
 asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior
 misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example
 happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining
 what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to
 pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to
 break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social
 inequality **The Guardian Index** ,2002
