*Digital Tools for Academic Branding and Self-Promotion* Cabrera, Marga,Lloret, Nuria,2016-10-31 Reputation can be a pivotal factor to potential success throughout one's academic career. By utilizing available technological assets and tools professionals can effectively manage their personal brands. *Digital Tools for Academic Branding and Self Promotion* is an authoritative reference source for the latest research on the interrelationship between digital branding and academic reputation. Showcasing relevant digital platforms and techniques this book is a compendium of vital material for academics, professionals, practitioners and marketers interested in effective reputation management. *University Rankings* Jung Cheol Shin, Robert K. Toutkoushian, Ulrich Teichler, 2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases, methodological issues, societal impact and policy implications providing readers with a deep understanding of these controversial comparators. The authors propose that university rankings are misused by policymakers and institutional leaders alike. They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys assessment of their status. The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings. While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself. It is a welcome contribution to an often highly charged debate. Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties. *Research Handbook on University Rankings* Hazelkorn, Ellen, Mihut, Georgiana, 2021-12-10 Gathering unique and thoughtful contributions from leading international scholars this timely Research Handbook offers diverse perspectives on university rankings twenty years after the first global rankings emerged. It presents an in depth analysis that reflects the current state of research on rankings their influence and impact.

*The Opinionated University* Brian Soucek, 2026-01-08 Why institutional neutrality is nothing but an illusion. Can a university ever truly be neutral in today's social and political climate? Pushing against the tide of universities increasingly pledging to stay neutral about contentious issues law professor Brian Soucek argues that their promises are doomed to fail. Universities can't help being opinionated. In *The Opinionated University* Soucek shows that neutrality is a myth by taking a deep dive into several prominent campus controversies of the day including diversity equity and inclusion DEI efforts and restrictions on campus speech and protest. Each issue requires universities to choose a side in what they do if not also in what they say. In everything from curricular and admissions decisions to their response to outside rankings and their evaluation of faculty universities express the values at the heart of their mission. Soucek argues that those pushing for neutrality are only preventing universities from standing up for their values whether in today's current moment of crisis or in periods of political calm. Both timely and deeply engaging *The Opinionated University* calls on universities to dispense with neutrality as a governing principle and focus instead on what their mission should be and who should determine it.
