Advanced Artificial Intelligence and Robo-Justice Georgios I. Zekos, 2022-05-16 The book deals with digital technology which is transforming the landscape of dispute resolution It illustrates the application of AI in the legal field and shows the future prospect of robo justice for an AAI society in the advanced artificial intelligence era In other words the present justice system and the influence of current AI upon courts and arbitration are investigated The transforming role of AI on all legal fields is examined thoroughly by giving answers concerning AI legal personality and liability The analysis shows that digital technology is generating an ever growing number of disputes and at the same time is challenging the effectiveness and reach of traditional dispute resolution avenues To that extent the book presents in tandem the impact of AI upon courts and arbitration and reveals the role of AAI in generating a new robo justice system Finally the end of the perplexing relation of courts and arbitration is evidenced methodically and comprehensively

Always Day One Alex Kantrowitz, 2020-04-07 A gangster read Scott Galloway author of *The Four A* must read Charles Duhigg author of bestselling *The Power of Habit* The tech giants are far from perfect but *Always Day One* reveals the inventive elements of their culture that entrepreneurs can and should learn from Mark Cuban serial entrepreneur investor and owner of the Dallas Mavericks At Amazon Day One is code for inventing like a startup with little regard for legacy Day Two is in Jeff Bezos's own words is stasis followed by irrelevance followed by excruciating painful decline followed by death Most companies today are set up for Day Two They build advantages and defend them fiercely rather than invent the future But Amazon and fellow tech titans Facebook Google and Microsoft are operating in Day One they prioritize reinvention over tradition and collaboration over ownership Through 130 interviews with insiders from Mark Zuckerberg to hourly workers *Always Day One* reveals the tech giants blueprint for sustainable success Kantrowitz uncovers the engine propelling the tech giants continued dominance at a stage when most big companies begin to decline And he shows the way forward for everyone who wants to compete with and beat the titans

Image-based Sexual Abuse Nicola Henry, Clare McGlynn, Asher Flynn, Kelly Johnson, Anastasia Powell, Adrian J. Scott, 2020-06-11 This book investigates the causes and consequences of image based sexual abuse in a digital era Image based sexual abuse refers to the taking or sharing of nude or sexual photographs or videos of another person without their consent It includes a diversity of behaviours beyond that of revenge porn such as the secret trading of nude or sexual images online upskirting

downblousing and other creepshots blackmail or sextortion scams the use of artificial intelligence to construct deepfake pornographic videos threats to distribute photographs and videos without consent and the taking or sharing of sexual assault imagery This book investigates the pervasiveness and experiences of these harms as well as the raft of legal and non legal measures that have been introduced to better respond to and prevent image based sexual abuse The book draws on groundbreaking empirical research including surveys in three countries with over 6 000 respondents and over 100 victim survivor and stakeholder interviews Guided by theoretical frameworks from gender studies sociology criminology law and psychology the authors argue that image based sexual abuse is more commonly perpetrated by men than women and that perpetration is higher among some groups including younger and sexuality minority men Although the motivations of perpetrators vary a dominant theme to emerge was that of power and control The gendered nature of the abuse means that it is best understood as a continuum of sexual violence because victim survivors often experience it as part of a broader pattern of gendered harassment violence and abuse Written in a clear and direct style this book will appeal to students and scholars of criminology sociology law and psychology Image based Sexual Abuse is also an essential resource for activists legal and policy practitioners technology companies and victim survivors seeking to understand the deeply complex nature of intimate image sharing in a digital era

A Guideline for its Usability in Production Systems* Alexander Volz, 2019-06-28 Bachelor Thesis from the year 2017 in the subject Engineering Mechanical Engineering grade 1.3 RWTH Aachen University language English abstract This thesis provides an especially designed overview for the needs of decision makers in the production industry on the field of machine learning By concerning economic and technological factors as well as the individual challenges for companies the goal of this thesis is to serve as a guideline for

the usage of machine learning in production systems After the revolutionary change caused by the introduction of the steam engine the production line electronics and IT into the manufacturing industry a new disrupting change is expected Nowadays the rapidly increasing digitalization of the economy leads to the fourth industrial revolution This global phenomenon is called Industrie 4 0 GER or Smart Factory US and it combines production technology with information and communication technology Especially data based optimization in production is one of the predominant goals of Industrie 4 0 For the automatized analysis of large amounts of data machine learning is an effective instrument and therefore a central element in Industrie 4 0 Recent progress in machine learning has been driven by the development of new learning algorithms and by the increasing availability of data and low cost computation power For many applications from computer vision to adaptive robots it was very difficult to devise deterministic rules However for these applications it is possible to collect data and now the idea is to use algorithms that learn from data instead of being manually programmed Thus machine learning has the potential to transform data into valuable knowledge for decision making while making improvements possible to the production system with approaches such as predictive maintenance The transfer of machine learning from the lab to the real world leads to an increased interest in learning techniques demanding further effort in explaining on how machine learning works and what it can be used for in other disciplines However the entry barrier to the diverse field of machine learning is high With many different algorithms theories and methods it is hard to oversee and therefore its influence remains limited In addition a recent study states that about 47% of jobs in the US are at high risk of computerization within the next decades Therefore employees feel insecure and demand answers on what effect machine learning will have on their future role in the factory
