Selected Reading in Quantitative Urban Analysis Samuel J. Bernstein, W. Giles Mellon, 2013-10-22 Selected Readings in Quantitative Urban Analysis focuses on the use of quantitative approaches in analyzing urban problems. The areas discussed are overall urban models, urban models dealing with the basic economic factors of urban life, workers and jobs, housing and transportation, urban models dealing with the provision of basic services, education, health care, fire, police, water, and sanitation, urban models dealing with the provision of the luxuries of urban life, theater, ballet, symphony, urban models dealing with how the decisions to provide these factors are made, policy formulation, and the resolution of conflicting priorities. This book is comprised of 11 chapters and begins with an outline of the major areas of urban life analyzed in a quantitative manner. Urban modeling is then introduced, and problems and pitfalls in urban model building are considered. The next section looks at the economic base of urban life with emphasis on labor markets and labor force, urban housing, markets, and housing policy, and policy and policy models in transportation. Subsequent chapters explore essential urban services including public education, community health services, fire protection, sanitation, and emergency medical services. The remaining sections discuss the amenities of urban life and urban politics and policy. This monograph should be useful to urban administrators and planners as well as students interested in urban problems. **New Broadways** Gerald M.

Berkowitz, 1997. This book charts the development of the regional theatres in America and how they have replaced Broadway as the starting point for most new work in the theatre. It also offers insights into what the future might hold for these regional theatres. **Amendments to the National Foundation on the Arts and the Humanities Act of 1965** United States.

Juntunen, 2016-01-29. This book demonstrates the political potential of mainstream theatre in the US at the end of the twentieth century, tracing ideological change over time in the reception of US mainstream plays taking HIV/AIDS as their topic from 1985 to 2000. This is the first study to combine the topics of the politics of performance, LGBT theatre, and mainstream theatre's political potential, a juxtaposition that shows how radical ideas become mainstream, that is, how the dominant ideology changes. Using materialist semiotics and extensive archival research, Juntunen delineates the cultural history of four pivotal productions from that period: Larry Kramer's *The Normal Heart* (1985), Tony Kushner's *Angels in America* (1992), Jonathan Larson's *Rent* (1996), and Moises Kaufman's *The Laramie Project* (2000). Examining the connection between AIDS, mainstream theatre, and the media reveals key systems at work in ideological change over time during a deadly epidemic whose effects changed the nation forever. Employing media theory alongside nationalism studies and utilizing dozens of reviews for each case study, the volume demonstrates that reviews are valuable evidence of how a production was hailed by society's ideological gatekeepers. Mixing this new use of reviews alongside textual analysis and

material study such as the theaters locations architectures merchandise program notes and advertising creates an uncommonly rich description of these productions and their ideological effects This book will be of interest to scholars and students of theatre politics media studies queer theory and US history and to those with an interest in gay civil rights one of the most successful social movements of the late twentieth century **Hearings** United States.
