Tuten,2022-11-25 From understanding markets consumers and value to explaining the marketing mix and illustrating the roles of analytics brand and customer experience today this award winning textbook introduces you to the essential concepts and tools for marketing in a digital age *Hotel & Motel Management* ,1979 *Broadcasting* ,1982-07 **Books and Pamphlets, Including Serials and Contributions to Periodicals** Library of Congress. Large-Scale Cross-Category Analysis of Consumer Review Content and Sales Conversion Leveraging Deep Learning Xiao Liu,2019 How consumers use review content in their decision making has remained a black box due to the labor intensive nature of extracting content from review text and the lack of data on review reading behavior In this study we overcome this challenge by applying deep learning based natural language

processing on a comprehensive dataset that tracks individual level review reading searching and purchasing behaviors on an e-commerce site to investigate how consumers use review content We extract quality and price content from more than 500 000 reviews spanning nearly 600 product categories We achieve two objectives First we describe consumers review content reading behaviors We find that although consumers do not read review content all the time they do rely on review content for products that are expensive or of uncertain quality Second we quantify the causal impact of content of read reviews on sales We use a regression discontinuity in time design and leverage the variation in the review content seen by consumers due to newly added reviews To extract content we use supervised deep learning techniques that identify six theory driven content dimensions We find that aesthetics and price content in the reviews significantly affects conversion across almost all product categories Review content has a higher impact on sales when the average rating is higher and the variance of ratings is lower Consumers depend more on review content when the market is more competitive immature or when brand information is not easily accessible A counterfactual simulation suggests that reordering reviews based on content can have the same effect as a 1.6% price cut for boosting conversion
