Our Choice Al Gore, 2009-11-03 The former vice president and author of such best sellers as *An Inconvenient Truth* and *Earth in the Balance* presents a follow up work to address key environmental issues while profiling and evaluating possible solutions

Our Choice Al Gore, Albert Gore, 2009 *An Inconvenient Truth* explained the challenges of climate change Now Al Gore proposes the solutions This YA edition of Al Gore's book has been specially edited for readers of around 11 plus the young people who will in fact be dealing with global warming throughout their lives Sections aimed specifically at adults have been omitted in favour of clear text appropriate photographs and easily understandable graphs

*Rethinking Climate Change Research* Pernille Almlund, 2016-04-08 The problems and debates surrounding climate change possess closely intertwined social and scientific aspects This book highlights the importance of researching climate change through a multi disciplinary approach namely through cultural studies communication studies and clean technology studies These three dimensions taken together have the ability to constitute a positive agenda for climate change science in its broader understanding To cope with the climate change challenge not only do we need new energy efficient technologies other ways of living and new ways to communicate but we especially need new ways to start thinking about climate change across disciplines and backgrounds We need to begin thinking across engineering cultural science and communication in order to create innovative solutions as well as to generate optimistic and progressive narratives about the future Accentuating these softer scientific disciplines their overlaps and the positive discourses they can create this book provides some more profoundly researched themes pertaining to climate change and by that strengthening the analytical as well as the integrative approaches toward the fundamental questions at stake

**Global Warming and Climate Change** A K Singh, 2023-11-08 To avoid climate disaster we have a single mission to protect conserve and hand over the planet to the next generation The time has already lapsed when we thought we could greedily exploit the exhaustible natural resources of mother earth Now we have come to know that the world is not a piece of commodity to squander her natural wealth without offsetting the cost of emission or discharge of waste There is only one considerably serious concern that will markedly define the future consequence of this planet more than any other is the threat of global warming Inter Govt Panel On Climate Change Climate change is no longer a dilemma or a riddle to solve Science has proved it beyond reasonable doubt It is happening here and now with all of us where we have already crossed multiple tipping points of no return Climate change is very complex yet the solution is very simple Just stop burning fossil fuels

A K Singh We had a 67 percent chance of limiting the global temperature rise to below 1.50 C till 2018 We emit 42 Gt of CO<sub>2</sub> every year Now we have left not more than 420 Gt of CO<sub>2</sub> budget to squander at current emission level within roughly another 8 years IPCC page 108 chapter 2 People are suffering People are dying Entire ecosystems are collapsing We are in the beginning of mass extinction And all you can talk about is money and fairy tales of eternal economic growth How dare you Greta Thunberg Sweden

**Green Governance**

Burns H. Weston, David Bollier, 2013-01-21 The vast majority of the world's scientists agree we have reached a point in history where we are in grave danger of destroying Earth's life sustaining capacity. But our attempts to protect natural ecosystems are increasingly ineffective because our very conception of the problem is limited: we treat the environment as its own separate realm, taking for granted prevailing but outmoded conceptions of economics, national sovereignty and international law. Green Governance is a direct response to the mounting calls for a paradigm shift in the way humans relate to the natural environment. It opens the door to a new set of solutions by proposing a compelling new synthesis of environmental protection based on broader notions of economics and human rights and on commons based governance. Going beyond speculative abstractions, the book proposes a new architecture of environmental law and public policy that is as practical as it is theoretically sound.

**Tablet Computers in School Libraries and Classrooms** Heather

Moorefield-Lang, Carolyn Meier, Rebecca Miller, 2014-05-30 This succinct e-book speaks directly to librarians and educators working with young people, pointing the way towards intelligent, constructive use of tablets to attain educational goals.

*The City Reader* Richard T. LeGates, Frederic Stout, 2011-01-11 The fifth edition of the highly successful City Reader juxtaposes the best classic and contemporary writings on the city. It contains fifty-seven selections, including seventeen new contributions by experts including Elijah Anderson, Robert Bruegmann, Michael Dear, Jan Gehl, Harvey Molotch, Clarence Perry, Daphne Spain, Nigel Taylor, Samuel Bass Warner and others, some of which have been newly written exclusively for The City Reader. Classic writings from Ebenezer Howard, Ernest W. Burgess, LeCorbusier, Lewis Mumford, Jane Jacobs and Louis Wirth meet the best contemporary writings of Sir Peter Hall, Manuel Castells, David Harvey, Kenneth Jackson. This edition of The City Reader has been extensively updated and expanded to reflect the latest thinking in each of the disciplinary areas included and in topical areas such as sustainable urban development, climate change, globalization and the impact of technology on cities. The plate sections have been extensively revised and expanded and a new plate section on global cities has been added. The anthology features general and section introductions and introductions to the selected articles. New to the fifth edition is a bibliography listing over 100 of the top books for those studying cities.

Urbanism in the Age of Climate Change Peter Calthorpe, 2010-12-20 Cities are green is becoming a common refrain. But Calthorpe argues that a more comprehensive understanding of urbanism at the regional scale provides a better platform to address climate change. In this groundbreaking new work, he shows how such regionally scaled urbanism can be combined with green technology to achieve not only needed reductions in carbon emissions but other critical economic and lifestyle benefits. Rather than just providing another checklist of new energy sources or one-dimensional land use alternatives, he combines them into comprehensive national growth scenarios for 2050 and documents their potential impacts. In so doing, he powerfully demonstrates that it will take an integrated approach of land use transformation, policy changes and innovative technology to transition to a low carbon economy. To accomplish this, Calthorpe synthesizes thirty years of experience, starting with his ground-breaking work in

sustainable community design in the 1980s following through to his current leadership in transit oriented design regional planning and land use policy Peter Calthorpe shows us what is possible using real world examples of innovative design strategies and forward thinking policies that are already changing the way we live This provocative and engaging work emerges from Calthorpe s belief that just as the last fifty years produced massive changes in our culture economy and environment the next fifty will generate changes of an even more profound nature The book enhanced by its superb four color graphics is a call to action and a road map for moving forward *IBSS: Political Science: 2009 Vol. 58* The British Library of Political and Eco,2010-11 First published in 1952 the International Bibliography of the Social Sciences anthropology economics political science and sociology is well established as a major bibliographic reference for students researchers and librarians in the social sciences worldwide Key features Authority Rigorous standards are applied to make the IBSS the most authoritative selective bibliography ever produced Articles and books are selected on merit by some of the world s most expert librarians and academics Breadth Today the IBSS covers over 2000 journals more than any other comparable resource The latest monograph publications are also included International Coverage The IBSS reviews scholarship published in over thirty languages including publications from Eastern Europe and the developing world User friendly organization all non English titles are word sections Extensive author subject and place name indexes are provided in both English and French **National Journal** ,2009 **Time** ,2009 Adirondack Life ,2009 *Braille Book Review* ,2011 **Talking Book Topics** ,2012-11 BiblioAsia ,2008-07 Braille Books Library of Congress.
