*The Search For Our Cosmic Ancestry* Nalin Chandra Wickramasinghe,2014-10-21 The idea that life is a cosmic rather than a purely terrestrial phenomenon has progressed from scientific heresy to mainstream science within the short timespan of a few decades The theory of cometary panspermia developed by Fred Hoyle and the present author in the 1970 s has been vindicated by a spate of new discoveries in astronomy and biology and also with startling new evidence of microbial fossils in meteorites and micrometeorites The recent Kepler Telescope searches for exoplanets have indicated the presence of over 100 billion habitable planets separated by only a few light years thus making panspermia and the transfer of microbial life between such planets an inevitable fact The book presents a comprehensive and up to date account of the Hoyle

Wickramasinghe theory of cometary panspermia in a manner accessible to a wide general readership *Our Cosmic Ancestors* Maurice Chatelain,1988-09-01 Our Cosmic Ancestors is a dynamic work unraveling the messages of these universal astronauts and decoding the symbols and visual mathematics they have left for us in the Egyptian Pyramids Stonehenge the Mayan calendar the Maltese Cross and the Sumerian zodiac The book is captivating reading from beginning to end However Mr Chatelain s purpose in sharing these exciting discoveries lies in the hope that all humans will extend their horizons to release fear of the unknown just enough that another generation will exhibit growing curiosity to continue the search for signs of purposeful nurturing of this planet **International UFO Library: June / July 1994**
